

# INSTALLATION INSTRUCTIONS

AC/DC 12V

## SAFETY PRECAUTIONS:

Read all safety precautions and installation instructions carefully before installing or servicing this fixture. Failure to comply with these instructions could result in potentially fatal electric shock and/or property damage.

It is recommended that all wiring be performed by a qualified electrician. This fixture must be wired in accordance with all national and local electrical codes.

Do not handle any energized fixture or attempt to energize any fixture with wet hands or while standing on a wet or damp surface or in water.

Make sure that the power source conforms to the requirements of the fixture (see labels on fixture housing).

## INSTALLATION INSTRUCTIONS

1. Turn off power at the circuit breaker and the light switch. Ensure the power is off before continuing.
2. Use the positioning paper card to position the wall, and then use the electric drill to drill the hole.
3. When using shrapnel, the lamp can be directly stuck into the drill hole. (See Figure 1)
4. When using a spring, set the spring to 180° before placing the lamp into the borehole. (See Figure 2)
5. The wiring is connected through the terminal, and multiple lights can be connected in series through the terminal.
