Bäcker-Snack®

The better air chiller unit for cakes and snacks

Tip: You can find a low-priced version on page 26. Suitable beverage coolers for the front of counter are on page 110.

■ Comfortable digital temperature and defrost controller With WIHA CLOUD CONTROL, optionally available, more infos on page 432. ■ With WIHA CLOUD CONTROL: smart control and monitoring via WIHA app

WIHA Bäcker-Snack	For external cooling unit	With cooling unit and controller	Cooling power	Connection cooling unit
Model	ArtNo.	ArtNo.	[-10°ET]	
Bäcker-Snack 400 *	6000	20100	370 W	230V/270W

Bäcker-Snack 1200 L *	6009	20108	450 W	230V/350W

Delivery includes mounting frame. The refrigeration units for external cooling units include an expansion valve for R134a/R513A and built-in temperature sensors. The patented WIHA FRESHNESS SYSTEM, WIHA CLOUD CONTROL, protective machine cover and condensate pan/drain trap are available as accessories.

* Not available with FRESHNESS SYSTEM. ** Without base element, the cooling unit is connected via refrigerant couplings.

Special Accessories	ArtNo.		ArtNo.	
Condensate pan mounted under thecooling unit	33196	Protective machine cover type 370-825	33194	
Drain fitting 1 1/4" for connecting		Protective machine cover type 825 (2 air coolers)	33195	
to the customer's drain	3815			
TMP 620 controller for external cooling unit TMP 630-CLOUD controller with 2 freely usable	12201	Air cooler for operation with refrigerant CO ₂ (price per air cooler, see page 404)	10197	
outputs, for external cooling unit	33572			
TMP 630 controller instead of TMP 620 with 2 freely usable outputs	12210	Patented WIHA FRESHNESS SYSTEM see page 33.

with 2 freely usable outputs	33568	Base element UTB 51 optionally available,		
Detachable control panel (SPLIT-CONTROL)	12219	see table on page 406.		
extra charge for device with cooling unit in the bas	e housing	. •		

1. Air Chiller Units

straight installation

Description

Chiller unit with circulating air for cooling cakes, tarts and snacks with a merchandise height of up to 6 cm. To operate it, the customer should provide a glass top that should only be open on the air blow-off side.
Temperature: < 5°C at 25°C/60% relative humidity (climate class 3 according to

DIN EN ISO 23953).

Commercial product for the installation in stationary food and service counter.

Design

Interior pan is made entirely of stainless steel, material 1.4301, with flush threaded drain fitting (1 1/4") and round shaped hygienic corners (ROUND-BOTTOM) that are easy to clean. Pressure-injected expanded polyurethane insulation (CFC-free). The exterior is made of galvanised sheet steel. Inside the pan is a circulating air evaporator with coated surface and quiet low-voltage ventilators (12 V DC) for air circulation. Located above the circulating air evaporator is a merchandise display made of ground stainless steel, material 1.4301. To clean the pan bottom, the merchandise display with circulating air evaporator and ventilators can be folded upwards and looked in the top position via gas pressure springs.
The air blow-off area can be easily unfolded, so that the inner surfaces can be

cleaned of crumbs and remains of cream (EASY-CLEAN). To clean the surfaces of the evaporator, it can be folded down (MOVE-DOWN TECHNOLOGY) when the merchandise display is open. To clean the area behind the pan or to carry out servicing, the merchandise display can be moved forwards (MOVE-AWAY TECHNOLOGY). Installation is made easy by the mounting lip and stainless steel mounting frame. The surface of the mounting frame is ground.

For external cooling unit

Delivery includes:

- Expansion valve for R134a/R513A
- Built-in temperature sensor and defrost sensor

Cooling Unit Model

For model 400: The cooling unit is encased in a stainless steel housing and is located beneath the cooling pan. It is easy to remove for servicing. The TMP 620 digital defrost and temperature controller is mounted underneath the cooling pan.

Two air speeds can be selected for different food. A freely usable output can be used for counter lighting

With WIHA-LONG-LIFE for a longer operating life of the cooling unit.

For models 600-1600 D:

The cooling unit is encased in a stainless steel housing and is located beneath the cooling an. It is easy to remove for servicing. The TMP 620 digital defrost and temperature controller is mounted right next to the cooling unit.

Two air speeds can be selected for different food. A freely usable output can be

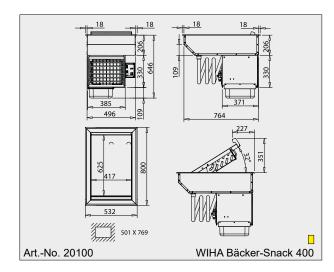

With WIHA-LONG-LIFE for a longer operating life of the cooling unit.

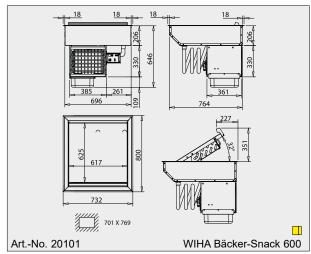

For model 2000 D:

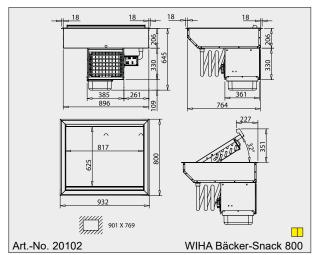

The cooling unit is fully pre-assembled and is connected to the cooling pan with refrigerant couplings. It comes with the TMP 620 built-in controller that is connected to the cooling unit and cooling pan via cable connectors. Two air speeds can be selected for different food. A freely usable output can be used for counter

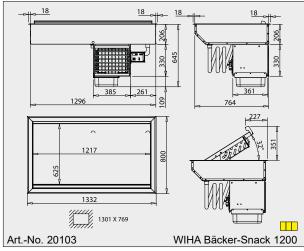

The counter design should include a well-ventilated base unit beneath the cooling

With WIHA-LONG-LIFE for a longer operating life of the cooling unit.

The drawings are shown with special accessory that is not included; more drawings are available on www.wiha-web.com under "Info Centre / Customer Area".

For external cooling units we recommend our Art.-No.

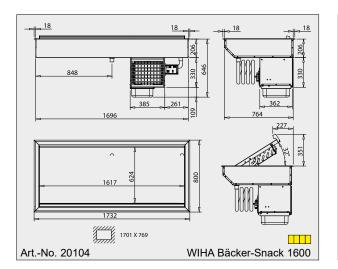

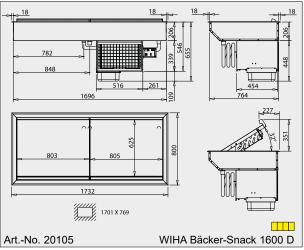

More information about the controller on page 410.

WIHA CLOUD CONTROL

Smart control and monitoring via the WIHA app and the internet. Control and monitor your devices conveniently with your smartphone and via the internet. Take advantage of the new possibilities for your HACCP concept. Save costs by automatically generating temperature reports. Optimise maintenance cycles for needs-based maintenance

Longer operating life of the cooling unit.

The WIHA-LONG-LIFE technology protects the cooling unit permanently from overloads e.g. due to inadequate cleaning or poor ventilation. In case of overload an alarm occurs. WIHA-LONG-LIFE avoids unnecessary wear and cost-intensive maintenance and repair.
