About Us

We Are 'bioscape'

HELLO AND WELCOME TO OUR WORLD OF AQUARIA!

We are a dedicated team of aquarium professionals specialising in the design, installation and maintenance of bespoke aquariums.

Aquariums have come a long way from the days of small glass boxes filled with trinkets and a few swimming creatures. Aquariums are now beautifully designed pieces of art, main attractions in your business, and a source of calm and serenity for your employees.

We have been serving clients across the UK for over 6 years and have a wealth of experience that we bring to each project. We are large enough to have access to the highest quality products and materials but small enough to give you the personalised service you deserve. We see our aquariums as living art forms, and not just a collection of random rocks and plants. We put our heart and soul into each design and have a 'head artist'.

This brochure outlines our step-by-step design process and also showcases the wide range of aquarium designs and styles available. We love talking fish, so please do not hesitate to contact us so that we may answer your questions and perhaps meet for a consultation.

Thank you and we look forward to meeting you soon!

Ross Satchell

The Process:

IT'S AS EASY AS 1-2-3 . . . 4-5-6!

1
2
3
4
5
6

STEP 1: STYLE

Choosing the design, style, shape and location of your aquarium is the most important stage in the process. We will explain all of the different options and variables available to you and listen to your needs. Together, we will identify the perfect aquarium for you.

STEP 2: FINISH

From wood to laminate to paint, there are hundreds of finishes to pick from. Whether you are looking for something soft and muted, or bright and bold, we can create the perfect surroundings for your custom aquarium.

STEP 3: AQUASCAPE

This is where we create a dynamic, exciting, evolving piece of living art. Based on your tastes, we will guide you and offer you a number of Aquascape options.

STEP 4: FISH!

What's an aquarium without fish?! You will be able to pick from our pre-selected packages which have been assembled based on the advice of our fish and aquarium experts.

STEP 5: BACKLIGHTING AND SIGNAGE

This is where we start to think 'outside the glass box'. You are able to create mood and ambiance using backlighting and we have a number of options to pick from. You also have the option of adding signage to your aquarium – an incredible branding opportunity.

STEP 6: SURROUNDING ADD-ONS

Add-ons that surround your aquarium, such as integrated seating and backsplashes, can take your aquarium to the next level. Let us show you some options.

The Final Result

Aquariums: Nature's Happy Pill

Did you know that studies carried out by the National Marine Aquarium and Exeter University show that aquarium therapy lowers anxiety, reduces blood pressure and heart rate, and creates an overall feeling of relaxation?

'Aquarium therapy' stimulates happy hormones in the brain, which have a calming effect on the body and mind. As humans, we have an innate attraction to nature and natural processes. Watching fish in their natural environment relaxes our minds, slows our heart rate, and in turn, can help to alleviate pain.

Have you ever wondered why so many dentist offices have aquariums? Studies have found that patients awaiting dental treatment in waiting rooms with aquariums require less pain relief.

Are you interested in the ancient practice of Feng Shui that harmonizes energy forces? The rules of Feng Shui say that placing an aquarium in the south-east corner of your room is an excellent way to bring positive energy (along with wealth and prosperity!)

Aquariums give us so much: beauty, serenity, and many health benefits too. Let BIOSCAPE help you learn more about how you could benefit from the magic of aquariums.

Good for Employees ...

Good for Your Bottom Line

A carefully thought out and well-designed workspace with plenty of natural light and other natural elements is extremely beneficial for a workplace. Why? Because it's good for your employees!

Showing current and potential employees you are committed to their wellbeing matters. It fosters positive optimistic mindsets, which then impacts positively on others.

Research has proven that happier employees are more productive and are less likely to be off work sick. According to the World Health Design, having an aquarium in your workplace has been proven to increase productivity by as much as 15% while enhancing the mood of your workforce.

A 15% increase in productivity means that even for a smaller businesses, there is a positive return on investment on an aquarium purchase within a few short months.

Further research has shown that people are able to concentrate better after relaxing and spending time around essences of nature. Studies have revealed that human interaction with nature can significantly alleviate stress, thus reducing frustration and distraction. In today's busy office environment, this can be invaluable.

Custom Designed and Custom Built

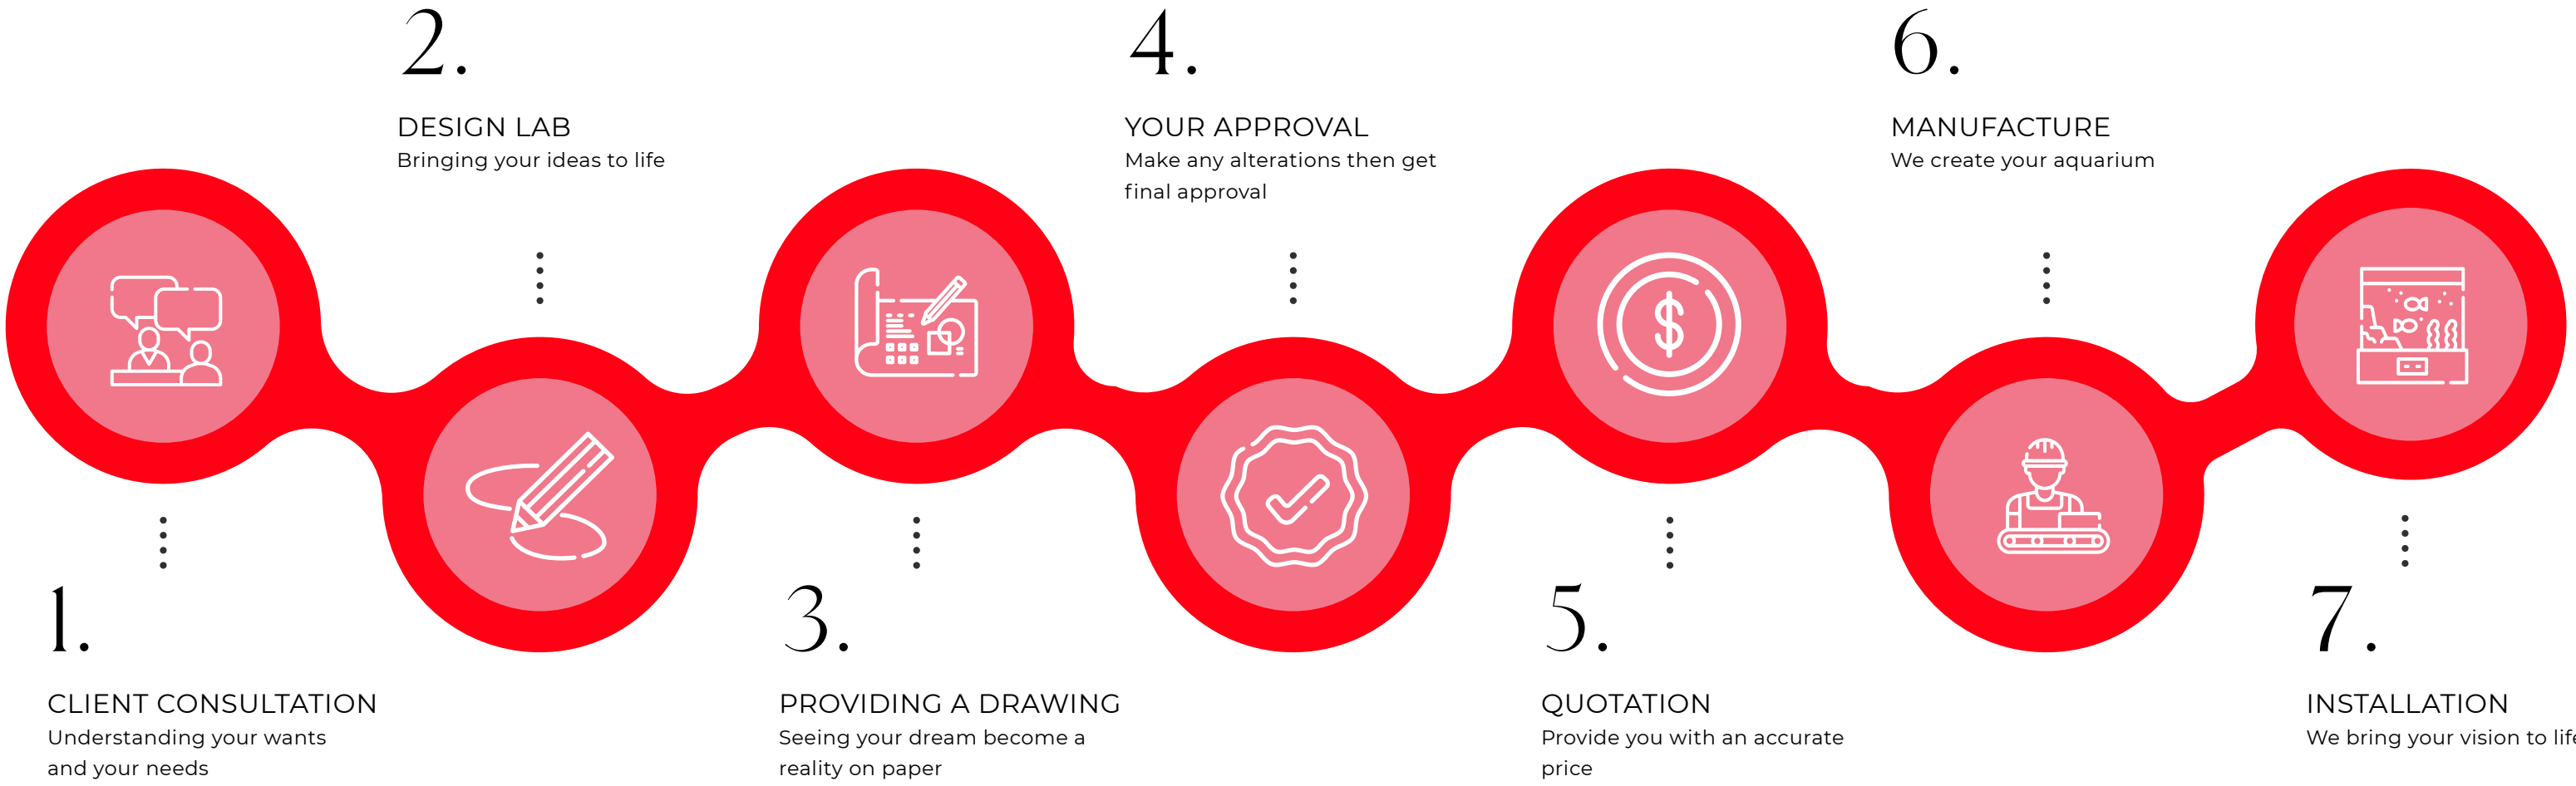

Our bespoke aquariums are as the name suggests: custom made for you or your organisation. They are designed with you in mind, and built to compliment your tastes and your surroundings.

We offer so many choices and options during the design of your aquarium, the possibilities are quite simply endless. We offer a full design service and even provide 2-3 concept drawings so you can see the end result before it is made.

You'd love an aquarium, but don't have the space? You very likely do. We can find a solution to almost all your aquarium queries. Our experience combined with our bespoke designs create a solution for every circumstance.

Are you considering a certain finish but you're not sure how it will look in person? We've got you covered! We have samples of the various laminates available, a living wall section, and mosses. This way you can touch and hold these products and really get a feel for them before making your final decision. Finally, let's talk budget. We respect our clients and are committed to their satisfaction, therefore we always carefully calculate the exact cost of all materials, installation works and maintenance so the quote you receive is the price you pay.

No nasty surprises – ever.

What Makes Us Special

AFTER HOURS AVAILABILITY

Whether it is for installation or maintenance, we offer after-hours service that is flexible and can meet the needs of you and your business.

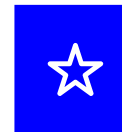

HEALTH & SAFETY

We are extremely aware of the health and safety requirements surrounding tank installations and maintenance. We always ensure that our work area around the aquarium has the requisite barriers so that your staff and customers are kept safe at all times.

EXTENSIVE TRAINING

All of our staff are trained to the highest standard and all have successfully completed the Ornamental Aquatic Trade Association (OATA) course and are accredited by the City and Guilds. Our staff also receive in house training, working alongside an already experienced aftercare team member for at least three months to ensure skills exceed the required levels.

DEADLINE

We will provide you with a realistic timeline of delivery and installation works, and the completion deadline is vital to us. Still, rest assured we will not rush this process as quality work is more important than speed.

DBS CHECK

All of our employees are fully DBS checked (Disclosures and Barring) before joining us so you have peace of mind.

FULLY INSURED

We are fully insured, providing full liability protection throughout the entire project.

LIFE-TIME WARRANTY

We are the only aquarium design and installation business that offers a full lifetime warranty on everything we supply. This demonstrates our commitment to quality.

RELIABLE

We understand that reliability is an essential factor when choosing a contractor, and we take great pride in always meeting all installation and maintenance appointments.

ON SITE BUILD

Even if physical access to your room or building is tight, a large aquarium is still possible. We offer a "build on-site" option so that larger aquariums need not be out of the question in more confined areas.

What Makes Our Products Special

The aquariums and parts we source are of the highest quality in the market, which is why we offer a **LIFETIME WARRANTY** on our aquariums. In addition to being beautifully designed and crafted, our materials also are:

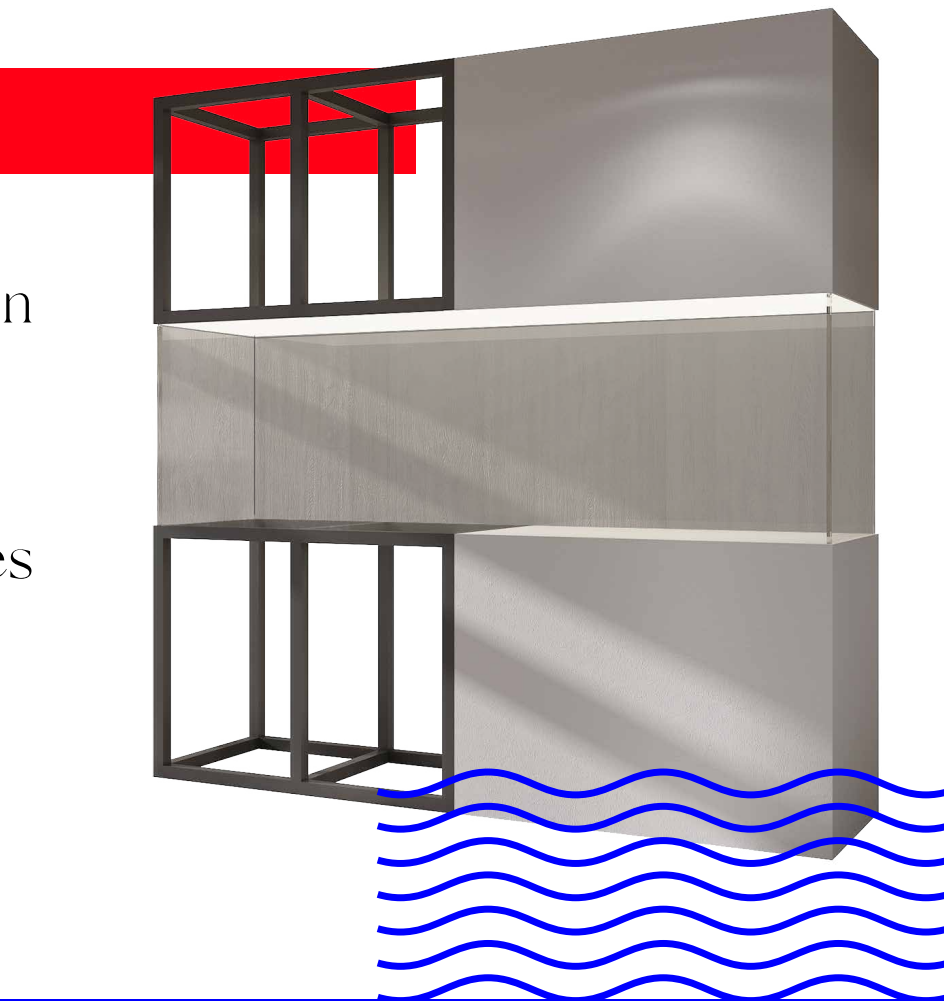

Sound insulated

Heatwave and cold protection

Able to fit any space

Made from engineered metal frames

Featuring smudge-proof glass

AWNING

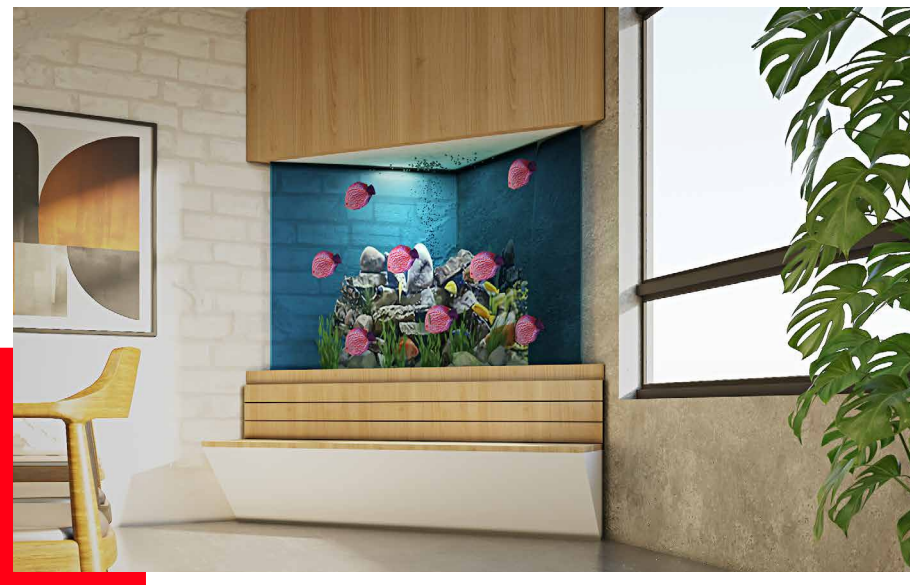

Triangular Tank

CORNER UNIT

DESCRIPTION

- 90/180-degree viewing.
- Can fit in almost any space.
- Custom seating can create a small nook .
- The wide-angle view gives the illusion of a larger aquarium.

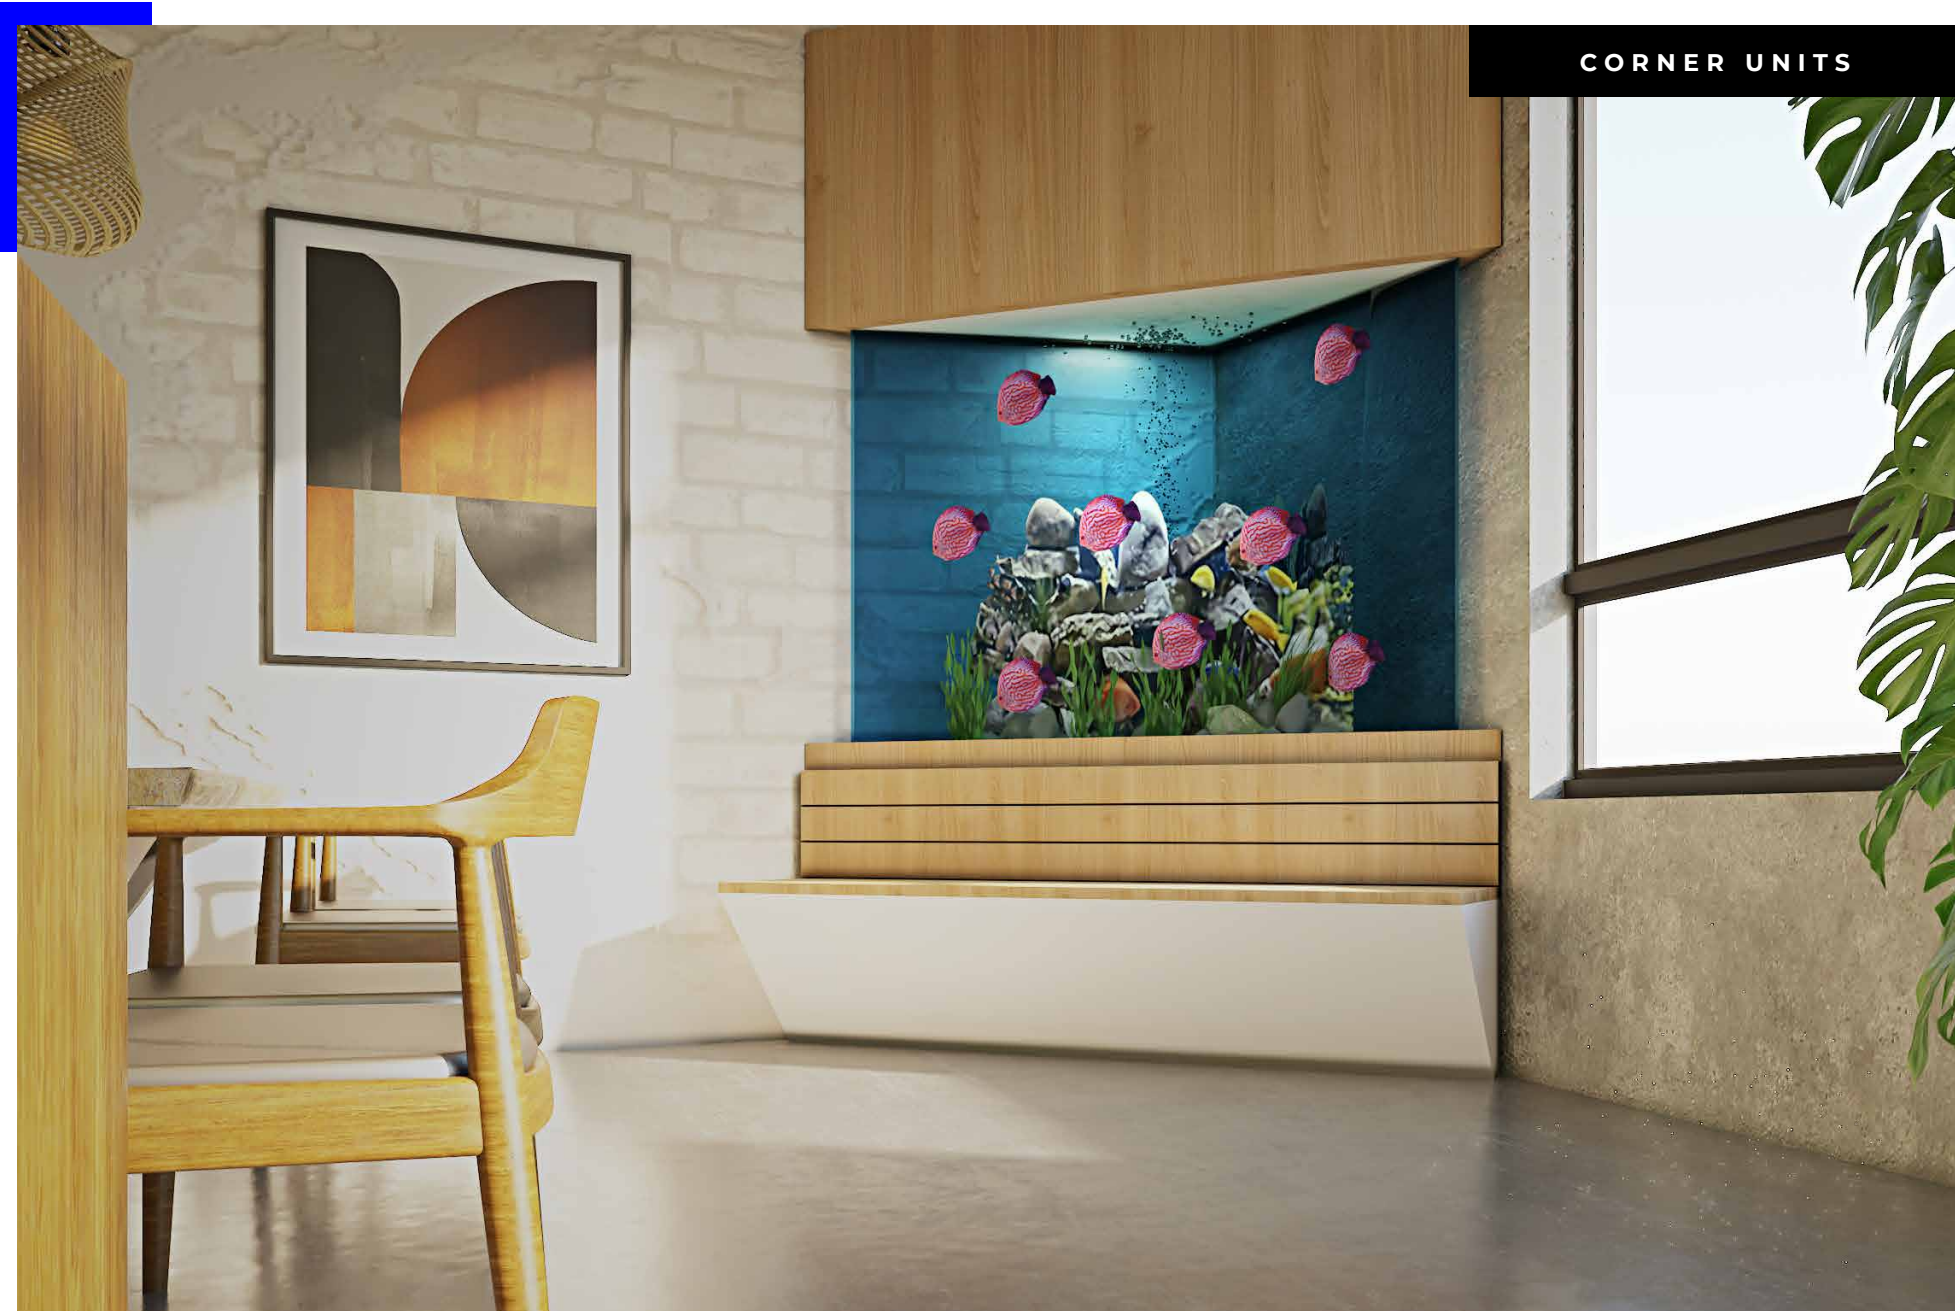

Bevelled Tank

CORNER UNIT

DESCRIPTION

- 90/180 degree, viewing.
- The beautiful bevelled edge gives an elegant look.
- Can fit in almost any space.
- Custom seating can create a cosy place to relax.

L-Shape Tank

CORNER UNIT

DESCRIPTION

- An L-shape aquarium with the correct seating layout can create the perfect relaxing, cosy chill-out area.
- The long stretches and 90-degree turn creates a natural river like swimming route, making the fish behave in a naturally breath-taking manner.
- Stunning panoramic view of up to 270 degrees.

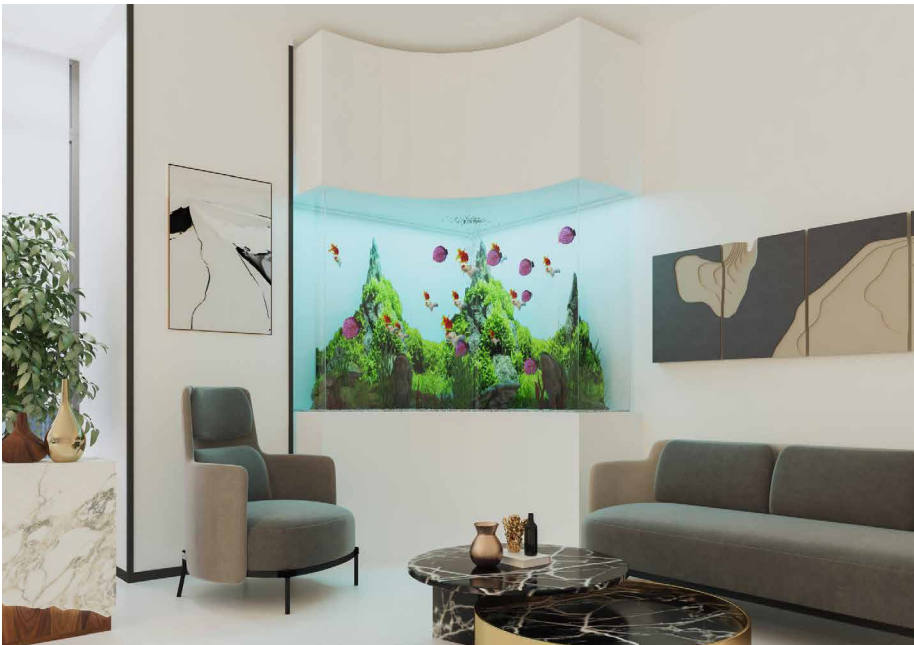

Curved Tank

CORNER UNIT

DESCRIPTION

- 90/180 degree, viewing.
- Can fit anywhere no matter the space.
- Custom seating can create a small nook.
- The wide-angle view gives the illusion of a larger aquarium.
- The curved front gives a truly unique view, making the aquarium appear much larger than it is.

Quarter Pipe

CORNER UNIT

DESCRIPTION

- 90/180 degree, viewing.
- Can fit anywhere no matter the space.
- The outward arching glass gives a beautiful feeling of space inside the aquarium.

MADE BY
BIOSCAPE

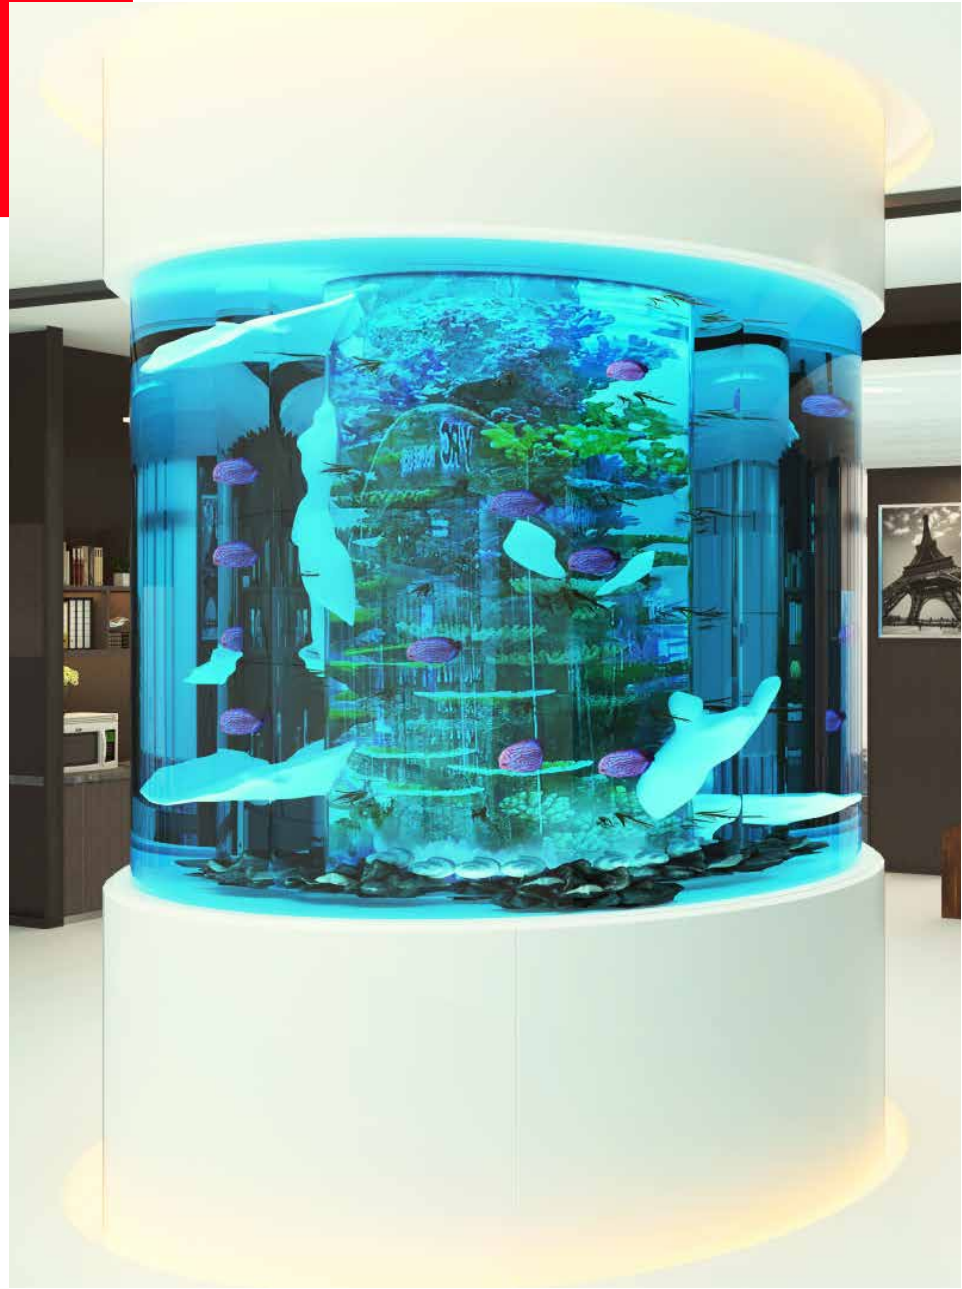

DAZZLING

Circular Tank

FREESTANDING 360°

DESCRIPTION

- The perfect 360-degree walk-around view of life in the underwater world.
- Can incorporate integrated 360 seating.
- An incredible and stylish alternative to a standard aquarium.
- Round shape promotes natural fish behaviour.

MADE BY
BIOSCAPE

Oval Tank

FREESTANDING 360°

DESCRIPTION

- A breath-taking addition to a room or open area.
- The perfect 360-degree walk-around view of life in the underwater world.
- Can incorporate integrated 360 seating.
- An incredible and stylish alternative to a standard aquarium.
- Round shape promotes natural fish behaviour.

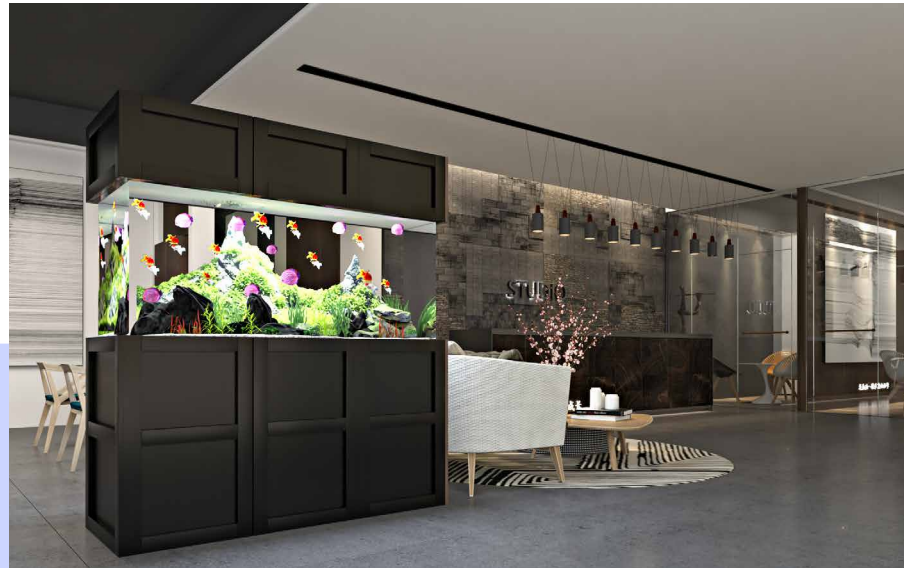

Rectangular Tank

FREESTANDING 360°

DESCRIPTION

- 360-degree view and movable.
- Free-standing aquariums are much quicker and easier to install, significantly reducing any inconvenience that may occur.
- Amazing 360-degree view of your fish in their unique habitat.
- Movable in the future should you redesign your space or move locations.

Square Tank

FREESTANDING 360°

DESCRIPTION

- Perfect 360-degree walk-around view of life in the underwater world.
- Ideal for smaller spaces with less floor area.
- Stylish and different; eye-catching design.

Hexagon

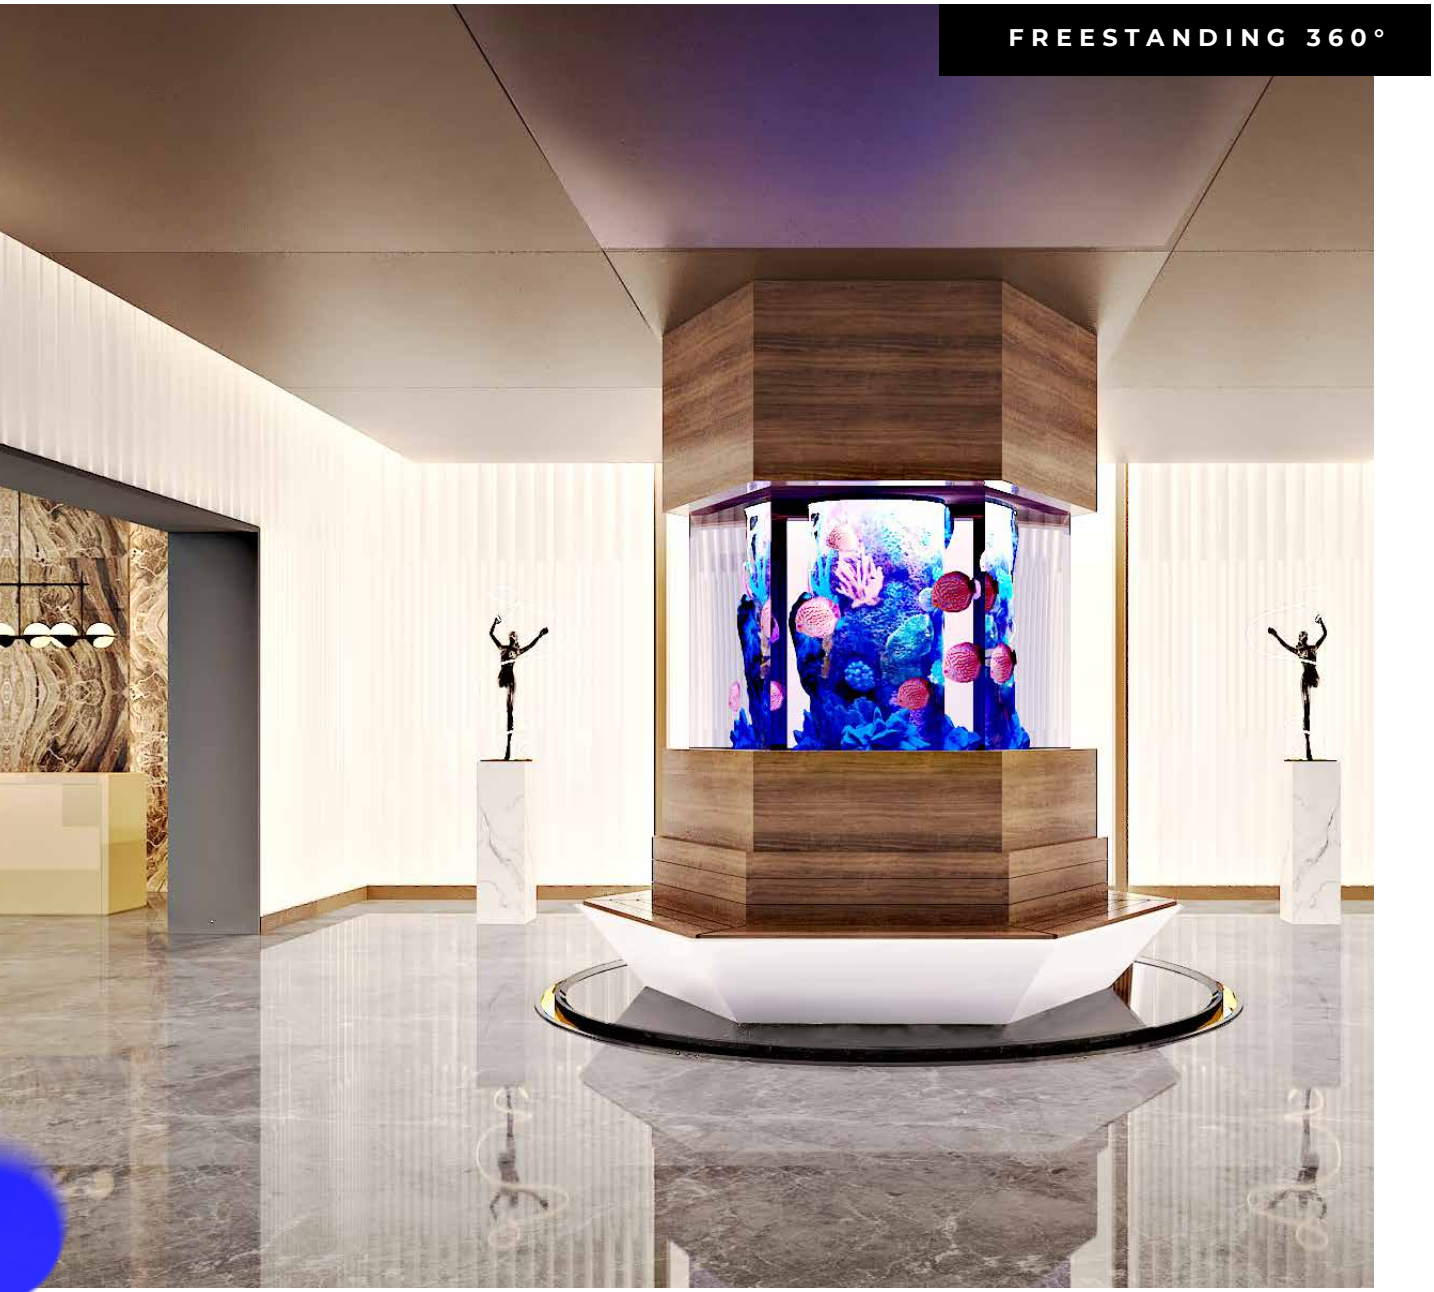

FREESTANDING 360°

DESCRIPTION

- Perfect 360-degree walk-around view of life in the underwater world.
- If you're looking for something a little different, or just a stylish alternative to a standard aquarium the column aquarium will promote natural fish behaviour.

MADE BY
BIOSCAPE

ELEGANT

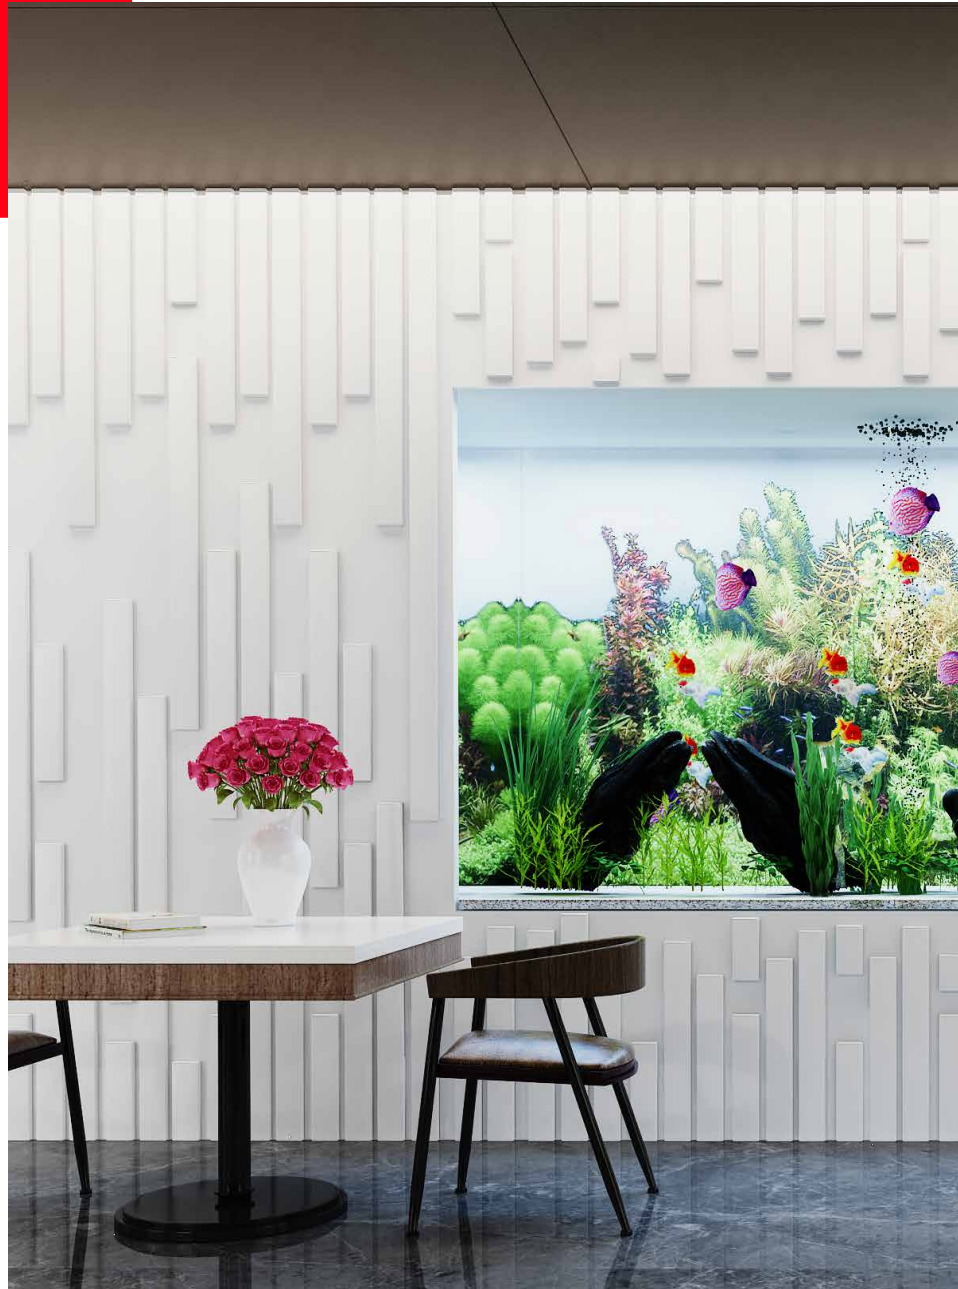

Widescreen Tank

WALL UNIT

DESCRIPTION

- Spectacular focal point to a room.
- Ideal for spaces with little floor space.
- Fits in any space.
- Adds a touch of class and elegance to any room.
- The bespoke nature of these aquariums means they can be utilised to fit into any available space.

Divider Tank

WALL UNIT

DESCRIPTION

- Completely see-through.
- 270 degree.
- Acts as a room divider while still letting light through.
- The contemporary way of dividing a large room, adding a touch of elegance to an otherwise plain large room.

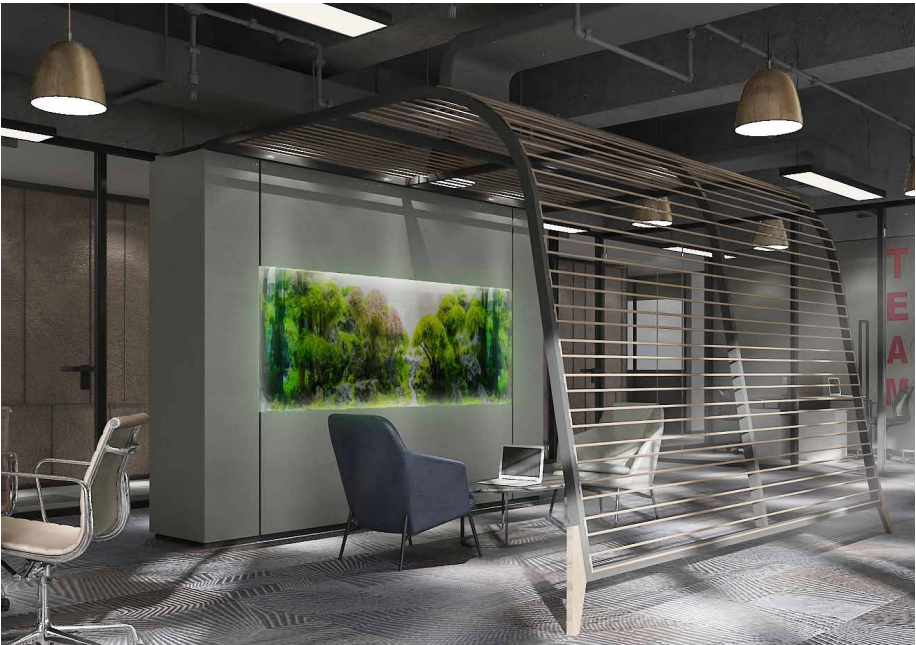

Awning Tank

WALL UNITS

WALL UNIT

DESCRIPTION

- Creates a private and relaxing space.
- Can be used for meetings or breakout areas.
- Creates a zone where you can relax, unwind and get away from any chaos.
- An innovative solution to a breakout area in a busy office environment.

Choosing a Finish.

Step 2

WOOD

PAINT

LAMINATE

MOSS

3D PANELLING

SHOW-STOPPERS

FAUX LIVING WALL

01. WOOD

You can choose the finish of your aquarium cabinet from a wide range of solid wood finishes. We can perfectly replicate your current interior or develop an excellent contrasting idea from the thousands of combinations available.

02. PAINT

Should you opt for a painted finish for your aquarium cabinet, there are hundreds of colours available or we can correctly colour match your existing colour scheme. Or we can help you chose a complementary colour from our colour wheel!

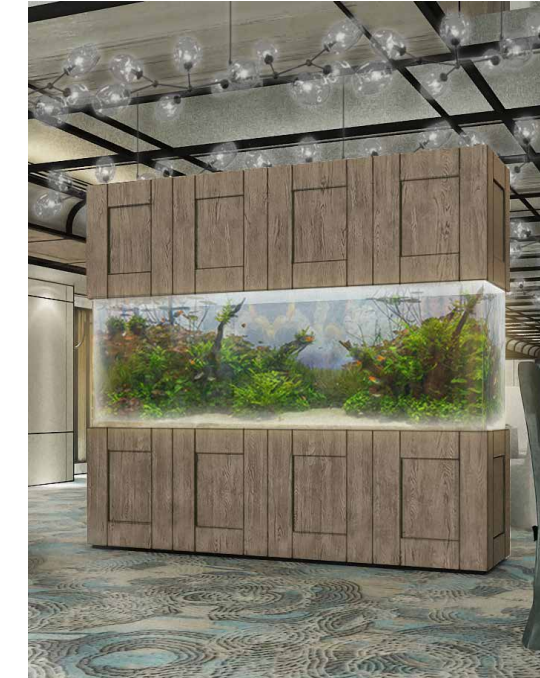

03. LAMINATE

Laminate finishes provide an excellent hard-wearing option as a finish for your aquarium cabinet. With hundreds of different finishes available, you're sure to find the perfect finish to complement the ambience of your room.

04. MOSS

Are you looking for something unique and a bit different from the norm? Have you considered moss? We use preserved moss as a finish to your aquarium cabinet, which gives an even more intensely natural look and feel to your aquarium.

01.

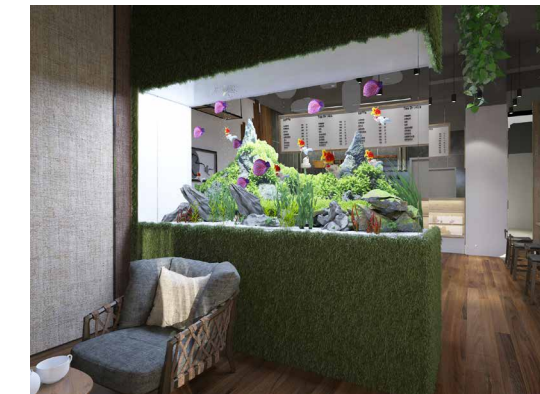

02.

03.

04.

05. 3D PANELLING

You can create the ultimate 'wow' factor with 3D panels as the finish to your aquarium cabinets. These are a real show-stopper that look rich and custom crafted. They blend perfectly with our many backdrop features.

06. FAUX FLOWER

A faux flower finish is a great option for an aquarium, giving an upbeat and pretty look. Our faux flowers are all handmade in the UK and we have many options to choose from.

07. FAUX LIVING WALL

Our faux living wall offers the natural beauty and look of a real living wall but without the ongoing maintenance. The artificial green wall option works perfectly as a cabinet finish.

07.

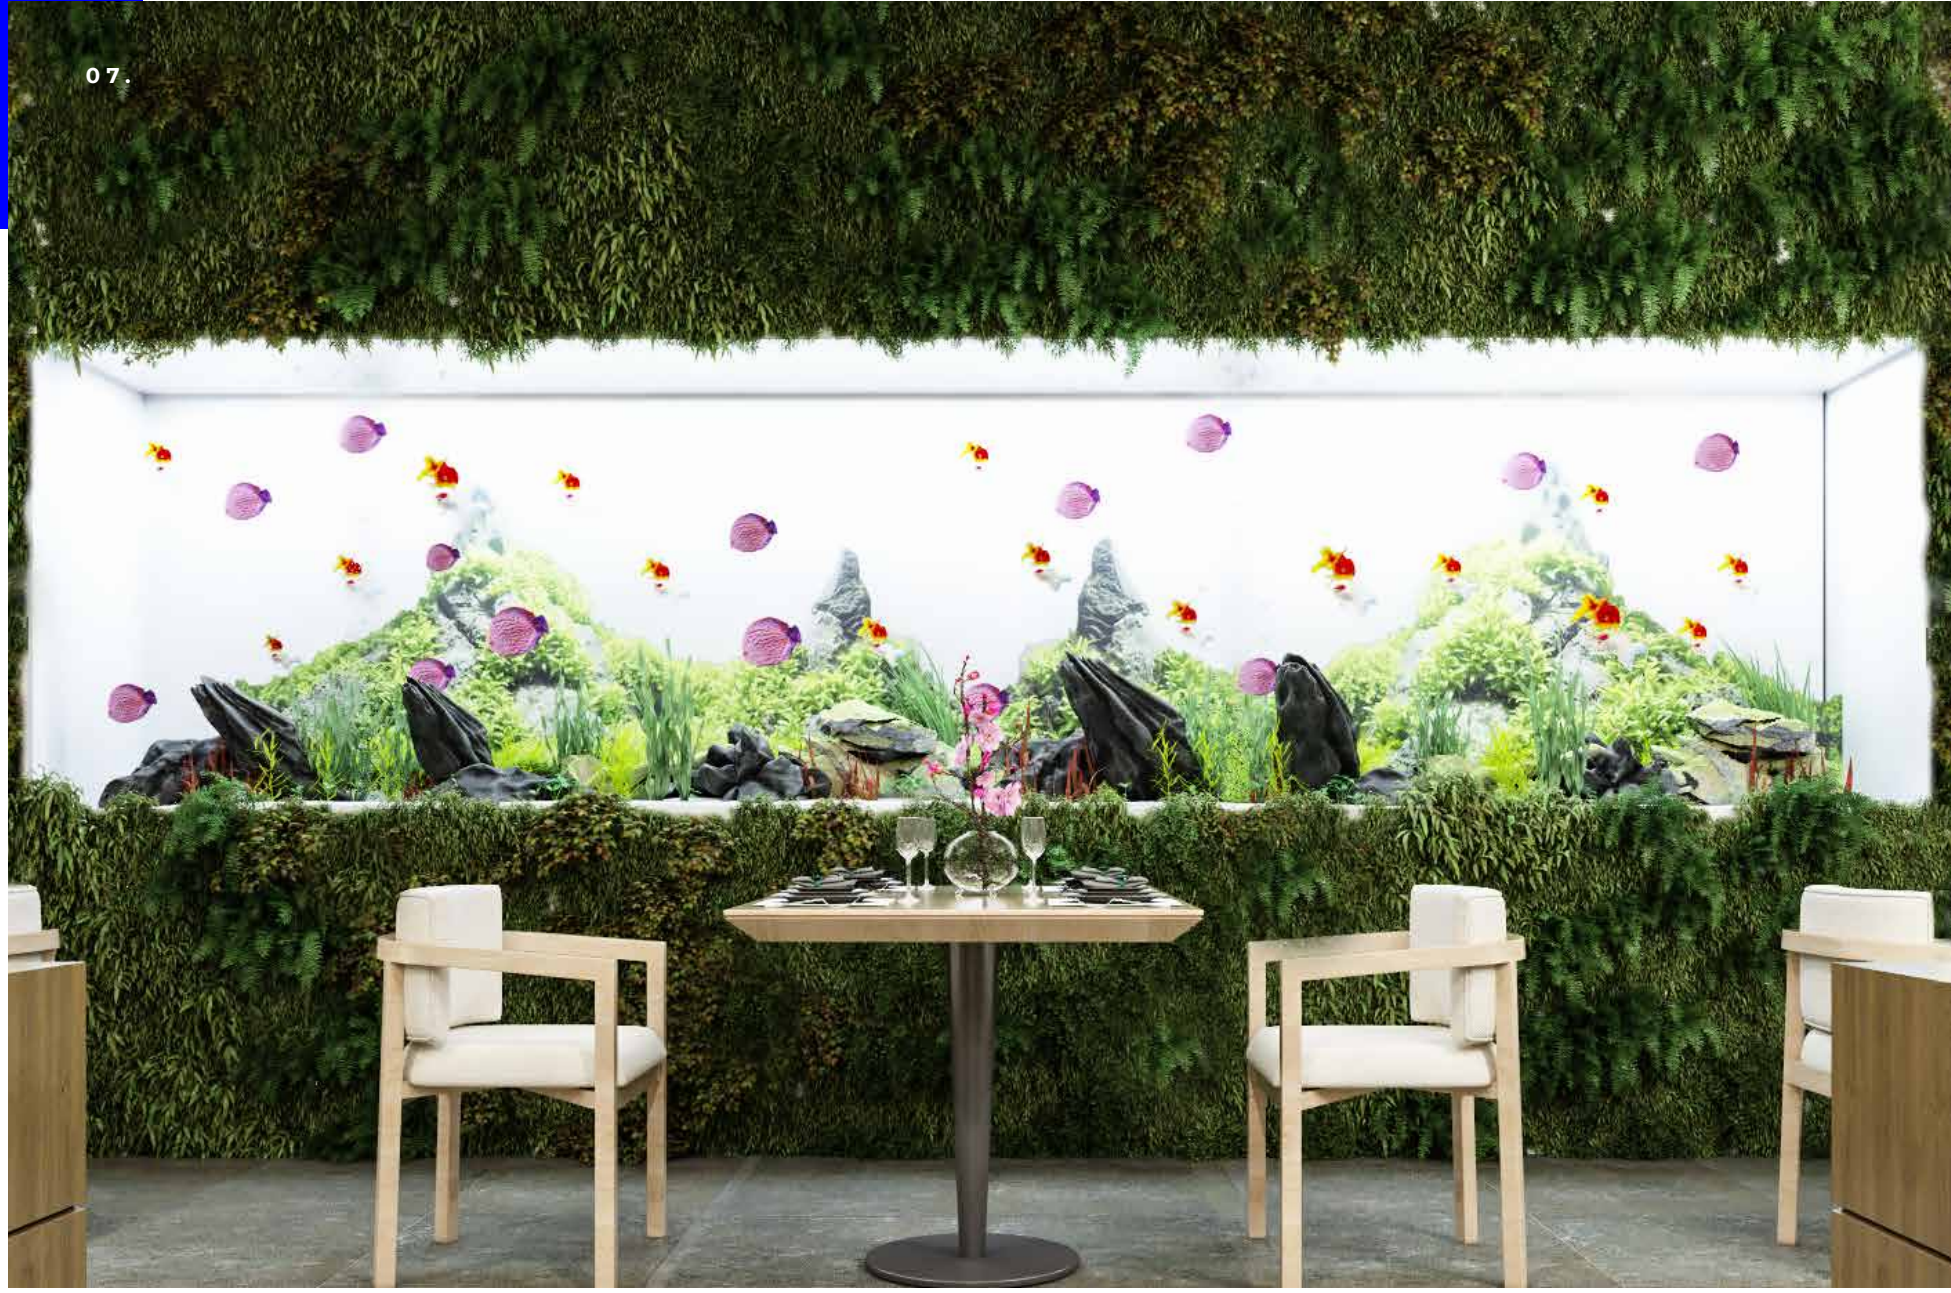

05.

06.

07.

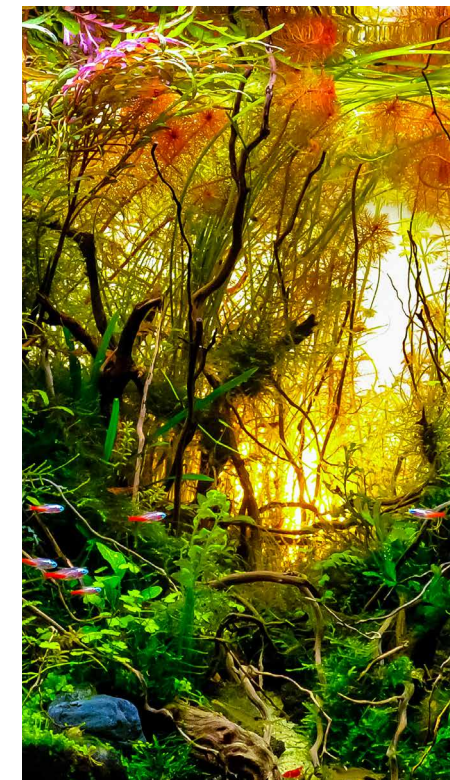

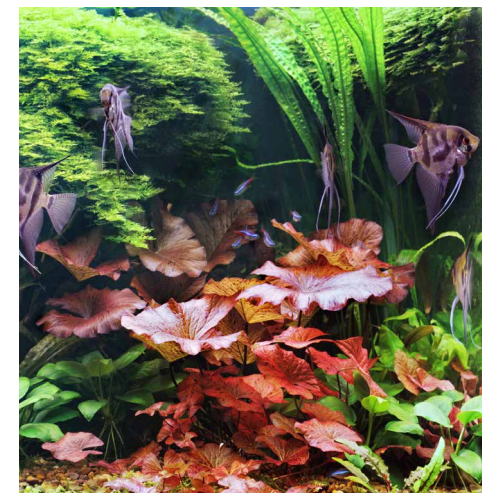

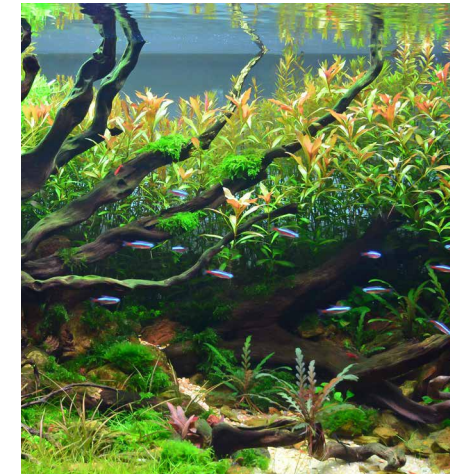

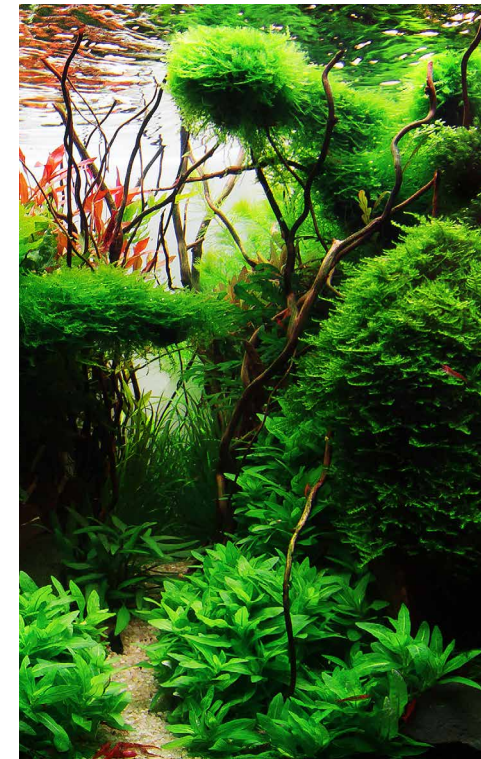

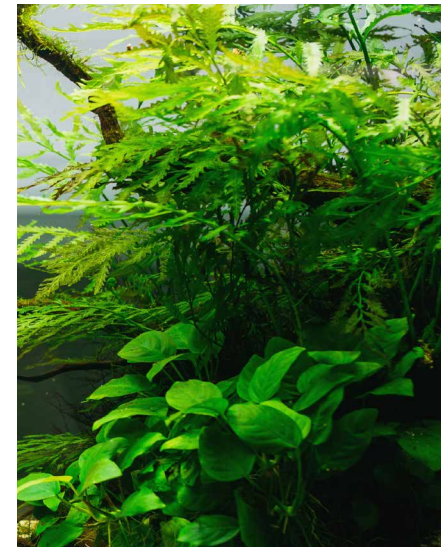

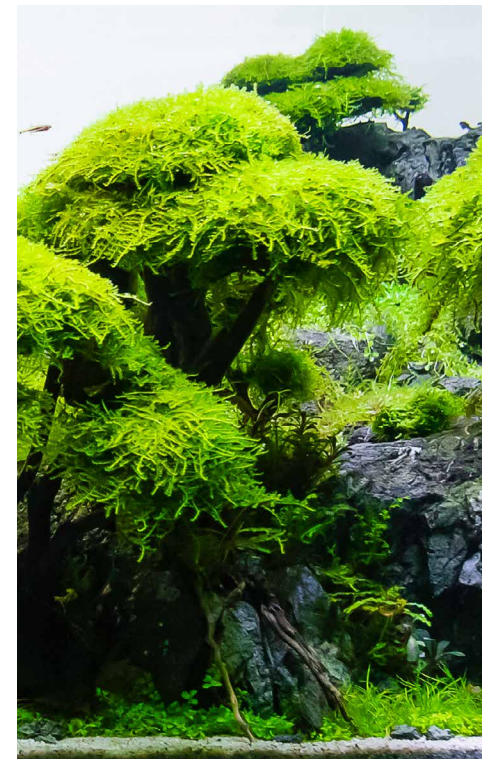

Step 3

Your Aquascape: Natural, Reef or Minimalist

SINCE 2017
BIOSCAPE

NATURAL

Full of nature, this style offers a truly undeniable piece of living art that is continuously evolving. The plant's movements combined with the back and forth of the fish offers not just a 'wow' factor but also huge benefits to those gazing at the scene. The lucky ones who are exposed to this style will feel it's positive effects.

REEF

We use the best artificial corals available, made from a combination of polymers, resins, silicones, and soft urethanes. These pieces allow you to create a beautiful coral reef effect in your aquarium. With a range of vibrant colours, the finished product is genuinely breath-taking.

MINIMALIST

The minimalist aquarium will fit into any environment but is especially suited to a contemporary professional setting. The minimal decoration allows watchers to focus on the fish and appreciate their beauty. The aquarium is stylish and sleek without being overwhelming.

Select your FISH

The Stars of the Show.

Step 4

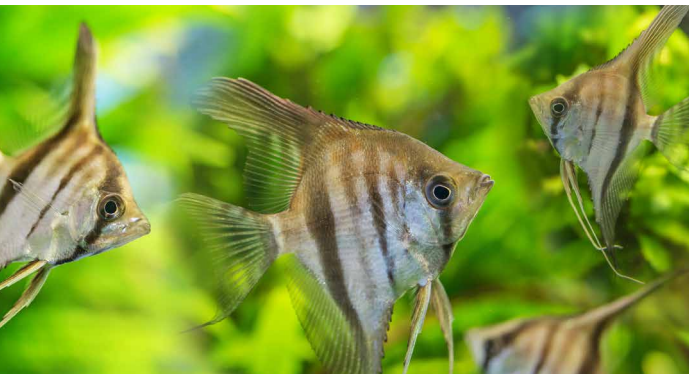

FLASHY

Are you looking for something bright, eye-catching and unique? You'll want the 'flashy' package. This package is filled with bright colours and interesting shapes and sizes.

COMMUNITY

Community fish are what makes a freshwater aquarium. This style features one or two large feature fish and then multiple smaller species in the mix. This is a style that is more indicative of what one would see in nature

Designing Your Background.

Step 5

Options

01. BACKGROUND LIGHTING

With background lighting, you are able to create a fading red sunset, highlight submerged crevices or relax to reflections of turquoise blue water.

This effect allows you to take your aquarium to a whole new level.

02. BACKGROUND SIGNAGE

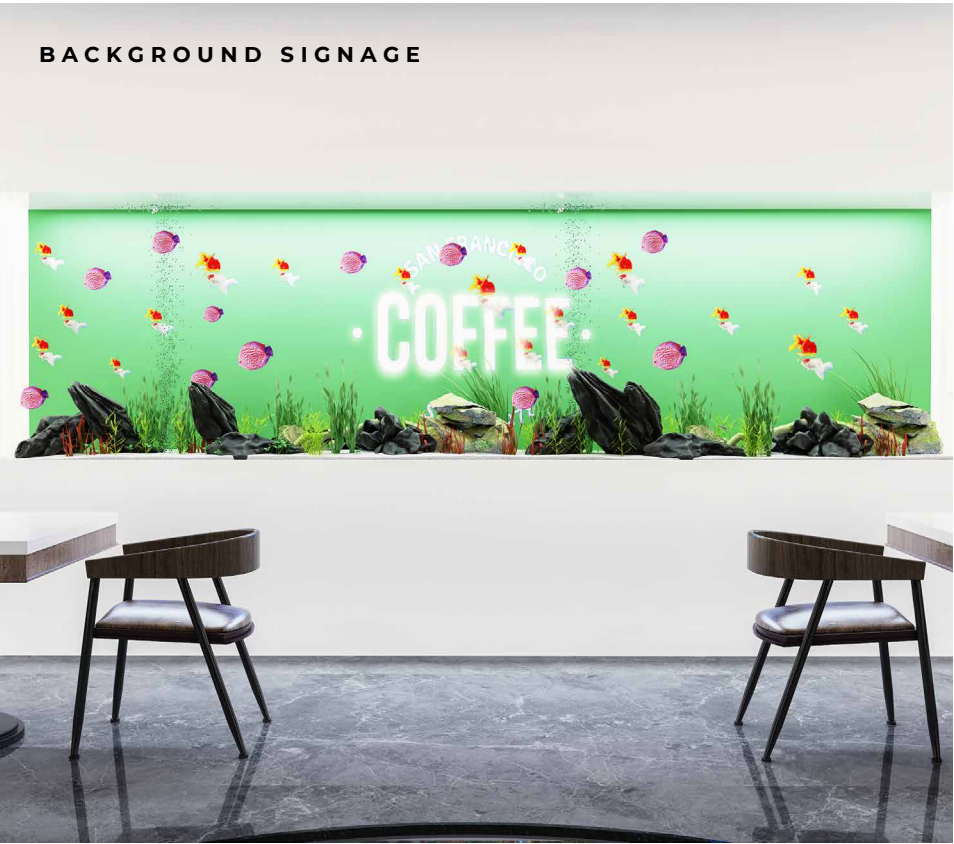

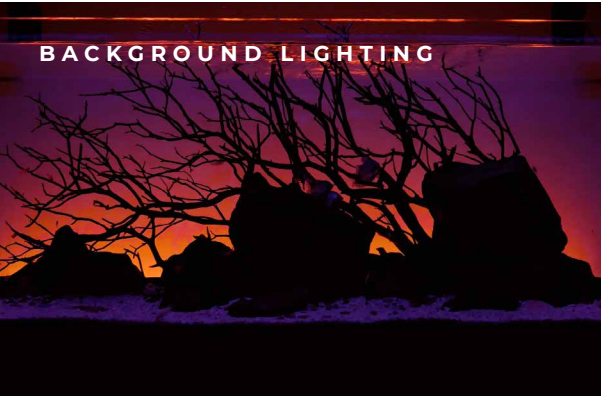

We can incorporate your company name or logo into our unique backlit system. You will be able to see your company name shine through your aquarium

What an incredible branding opportunity!

03. 3D SIGNAGE

We are able to create a 3D replica of your logo or company name, then submerge into your aquarium. The fish will swim in and around it, interacting and playing.

Such a fun option!

Extras.

Picking a Backsplash.

Integrated Seating Options.

Aquarium Signage.

Step 6

Picking a Backsplash

MADE BY
BIOSCAPE

MOSS

Our moss walls are made of real moss preserved with non-toxic natural glycerin. They require very little to no maintenance at all and create a striking natural look.

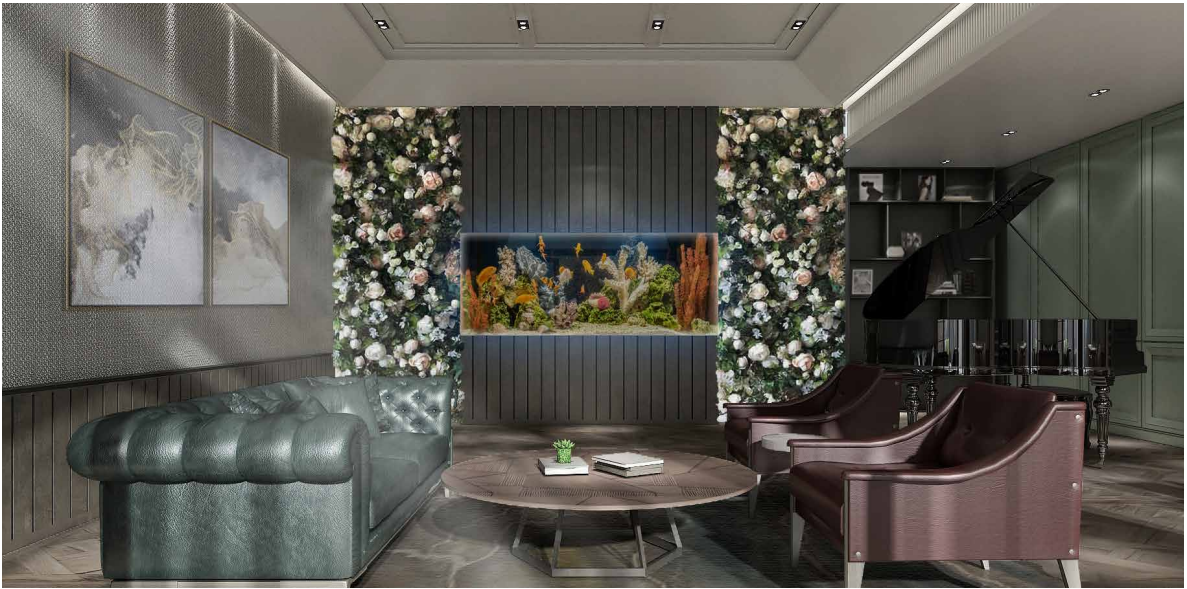

CLADDING

You can choose from our wide range of cladding backdrops, creating a genuinely breath-taking look that will perfectly complement your aquarium.

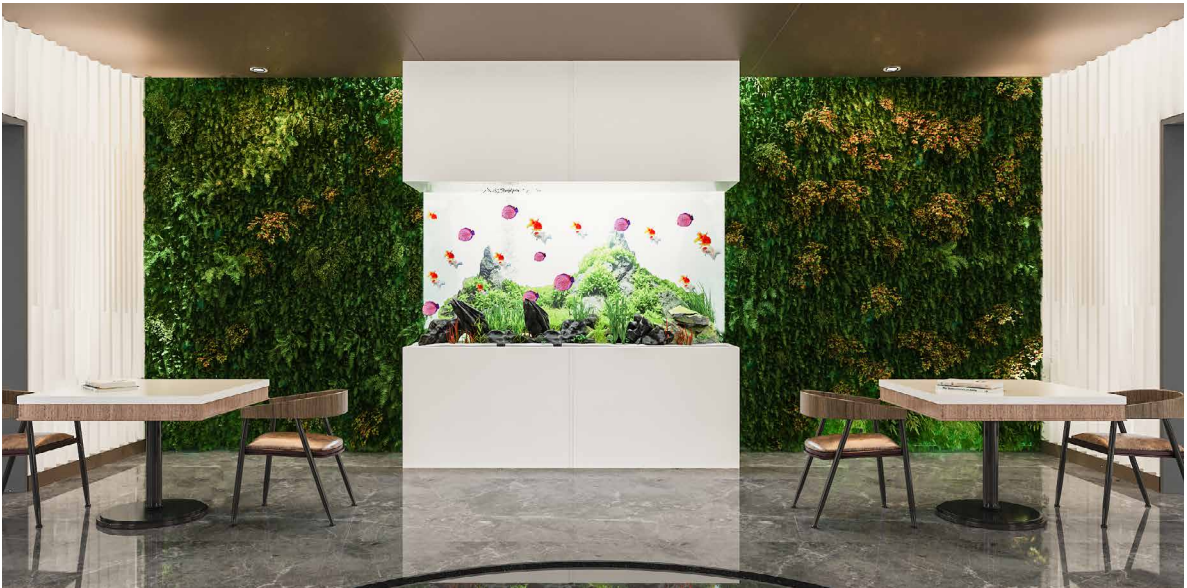

FLOWER WALL

Our faux flower walls create a pretty and fun backdrop for your aquarium. With plenty of colours and types to choose from, you can make your room shine!

LIVING WALL

Are you looking for a powerful visual statement that impresses clients, customers and employees too? Consider our living wall. This vertical garden takes up no space but adds a host of benefits beyond just the aesthetics. Made from real plants - nature's lungs that remove toxins from the air and breathing out oxygen – this wall creates a calming and relaxing atmosphere. Research by Exeter University showed staff well-being increased by an astonishing 47% as a result of a living wall installation!

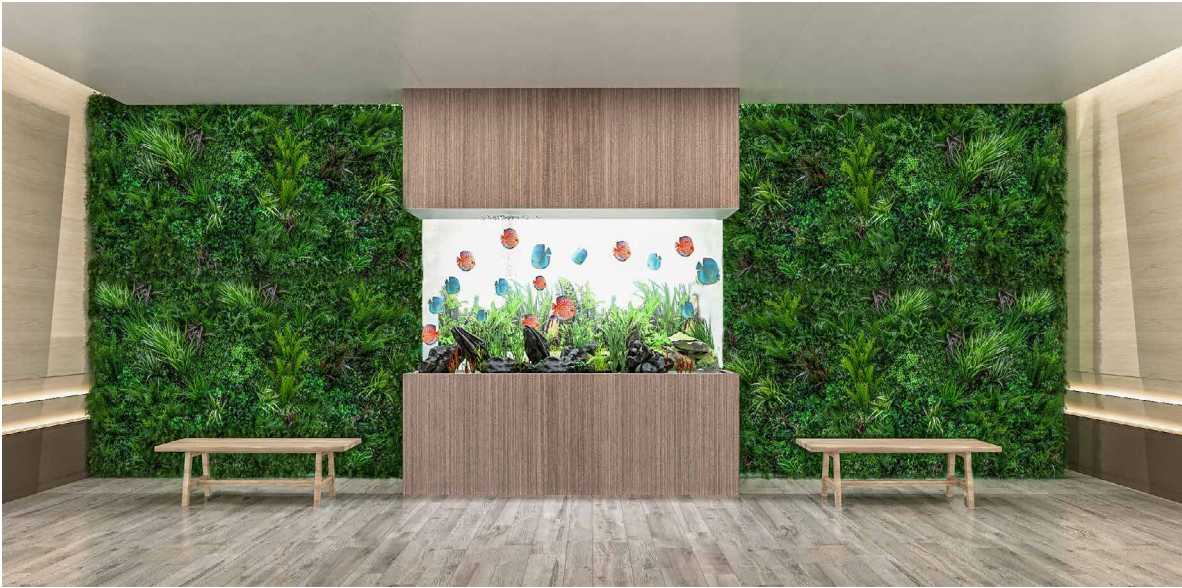

TILES

A tiled backdrop gives a modern contemporary look in any environment. It is maintenance-free and available in several different styles and colours, so you're sure to find something to suit your surroundings.

FAUX LIVING WALL

Artificial green walls are a smart option as they provide the 'feel good' visual of a living wall but with zero maintenance. They offer a fantastic alternative to a living wall, being beautifully designed and very realistic looking.

Have a Seat!
Integrated Seating Options

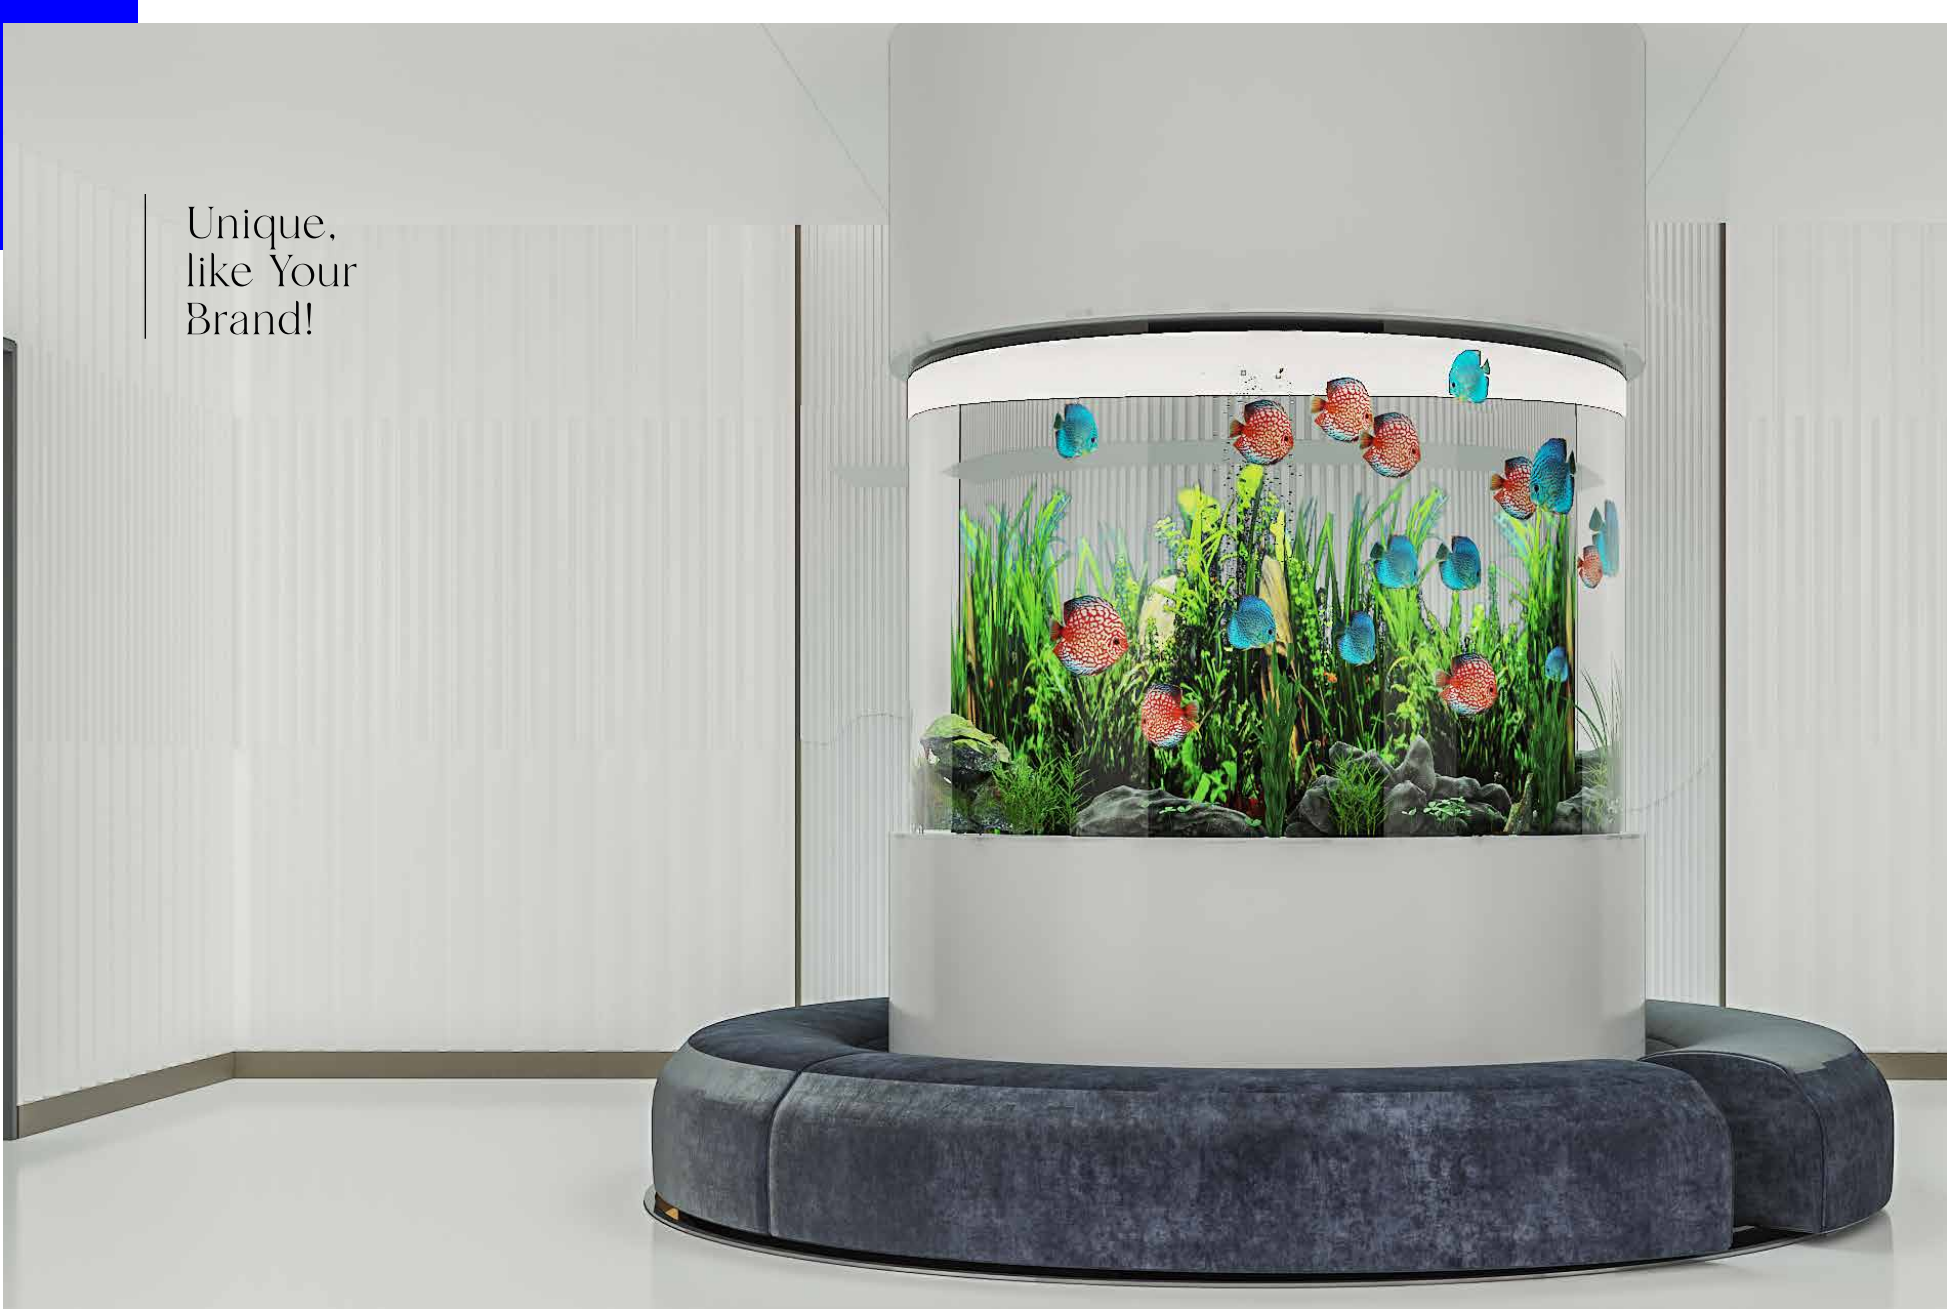

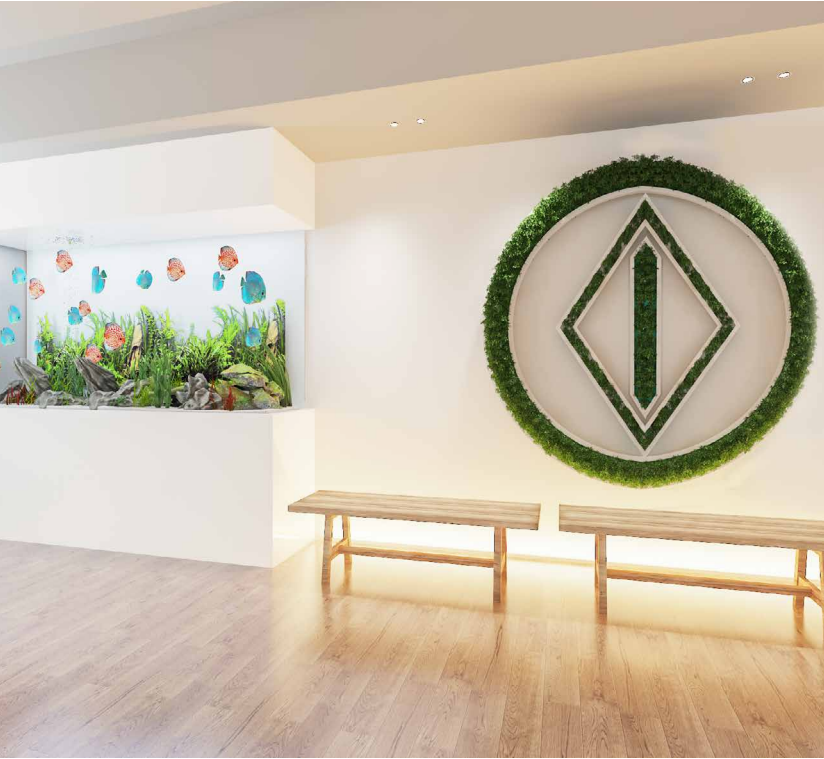

We have many options when it comes to seating. Because we offer bespoke designs, we can offer bench seating, integrated seating or a combination of the two. We also offer more traditional singular seating.

Aquarium Signage

Branding is everything, and it is even more important when you consider the number of visitors who will take photos, with or of, your spectacular aquarium. There are many options for you to consider, including 3D Signage and Lighted Options.

There is something for every taste and style, from subtle and natural to bright and bold.

Unique,
like Your
Brand!

Aftercare service

Here are some details of what is involved in aquarium maintenance:

ALGAE: We strive to eliminate unsightly algae during our service by scraping glass, scrubbing rocks and other features that might allow algae growth. We also add our specially formulated synthetic mixture during water changes.

DISEASE: We keep the inhabitants of your aquarium healthy by changing the water and monitoring the water's chemical makeup, ensuring the growth of beneficial bacteria, the lifeline of a healthy ecosystem.

DETRITUS: We aim to eradicate detritus by ensuring that we fit the correct circulation pumps. By regularly cleaning out the filters, we also vacuum clean the gravel to pick up any missed particles of decaying matter. The health of your fish is also monitored going forward during our after-care services.

EQUIPMENT MAINTENANCE: We maintain all mechanical equipment within your aquarium to help prevent failure. The equipment is regularly checked, all seals inspected and thoroughly cleaned, with parts replaced if necessary.

FEEDING: Let us take the hassle out of feeding with our automatic feeding system, delivering the right amount of food at the right time, reducing waste, overfeeding and detritus.

FINGERPRINTS: the external glass is cleaned upon every visit, and we apply a special coating that will prevent any fingerprint or smudges from forming on the glass.

MURKY WATER: We keep the water in your aquarium crystal clear with the use of our advanced filtration systems and with the addition of our specially formulated synthetic mixture.

SAFETY: As part of our aftercare, we clean the aquarium exterior. All of the products we use during our cleaning process are harmless to your aquarium inhabitants, unlike many cleaning products widely used in a commercial setting that may harm the fish.

ROTTING PLANT MATTER: Rotting plant matter can occur in aquariums and is a leading contributor to detritus. We carefully prune plants to remove dead areas and promote healthy new growth.

Enjoy nature daily
