JOIN THE FUTURE OF WEB3 AND BORDERLESS PAYMENTS.

ABOUT XCHAIN LABS

Introducing the next-generation Blockchain POS (Proof of Stake) system, an innovative solution that harnesses Non-Fungible Tokens (NFTs) as validators to revolutionize borderless payments. This state-of-the-art system is designed to eliminate traditional financial constraints, offering a seamless, secure, and efficient method for global transactions.

Challenges for the public sector, business, and individuals entering the new financial industry.

Lack of infrastructure for launching CBDCs

Time-consuming dollar transfers for foreign trade

Complicated banking system

Lack of transparency in the interaction between government and individuals

Low level of blockchain-industry knowledge among all segments of the population

Absence of regulatory instruments for taxation in the crypto industry

Xchain Network is a cutting-edge Layer 1 blockchain solution, designed to offer a seamless blend of centralized and decentralized infrastructure. As a scalable and secure platform, it is ideally suited for the issuance and development of Central Bank Digital Currencies (CBDCs) and other digital assets.

Built as a fork of the Optimism network on Ethereum, Xchain Network serves as the backbone of the Xchain DAO, empowering a new era of blockchain innovation. Its unique architecture is tailored to bridge the gap between government authorities and users, providing robust regulatory compliance and advanced transaction tracking capabilities.
XCHAIN Network Feautes:Pov System

Proof of Value System is the reward system for validators on the XCHAIN Network. A limited number of validators (up to 100) receive 70% of transaction fees. The remaining 20% is reserved to burn while 10% for community fund. All rewards are paid in B-USD or USDT.

The pool of validators comprises 100 influential and trusted individuals from the blockchain industry.

The reward system incentivizes them to increase activity on the network.
The reward is divided among validators in proportion to the total amount staked.

Transactions in **XCN**

70% for validadors

10% for community fund

20% for burning

Validators

At the core of this blockchain POS system, are NFTs that function as validators. Each transaction is authenticated and validated by a unique NFT, providing unmatched security and integrity. This approach not only ensures secure transactions but also streamlines the validation process, improving the overall efficiency of the system.

10% Investors

20% Partners

70% Foundation

Xchain has a limited supply of 15 Billions tokens, with no plans for future issuances, as reflected in the smart-contract parameters. This design feature is essential, as it creates scarcity and helps to maintain the token's value over time. By fixing the total number of tokens, there is no risk of inflation or dilution, which is a common concern with other cryptocurrencies. Overall, the fixed supply of XCN is a critical element in ensuring its long-term value and stability.

Token Name	Xchain Network
Supply	15 000 000 000
Token Ticket	XPAY
Starting Price	$0.00700

Private and Public Offerings

5,23% of the total token supply will be offered to early backers and 15% of the total token supply will be made available to the general public, enabling the broad community to participate in the Xchain and benefit from its growth and development.

Marketing Fund

3,7% of the total token supply will be allocated to a marketing fund, which will be used to fund marketing and outreach efforts to promote the Xchain blockchain and increase awareness and adoption of the Xchain brand. In summary, the distribution of Xchain tokens has been designed to ensure that all stakeholders have a vested interest in the success of the Xchain. By allocating tokens among various groups, 9 - 10 including the project team, advisors, community supporters, and the general public, the platform aims to foster a sense of community and collaboration, while enabling anyone to participate in the growth and development of the Xchain ecosystem.

Liquidity

12% of the total offer is for a liquidity fund to support the MM of the project on different DEX and CEX platforms to give the community on different markets to trade.

Community fund

10% of the total token supply will be allocated to an community fund, which will be used to fund the development of new features and initiatives on the platform and to support projects and initiatives that contribute to the growth and development of the Patex ecosystem.

Validators

12% of the total token supply will be allocated as rewards for validators, distributed over a period of 7 years. This incentivizes validators to actively participate in securing the blockchain network while ensuring a sustainable and long-term staking reward system

Team

The project team will receive 5% of the total XPAY token supply, which will be distributed over a period of time to ensure their continued involvement and commitment to the project.

Founders

The project founders will be allocated 5% of the total XPAY token supply, with a vesting schedule to ensure gradual distribution over time. This approach is designed to maintain their long-term involvement and commitment to the project's success.

Stake

15% of the total token supply will be dedicated to staking rewards, providing incentives for users to lock their tokens and contribute to the security and stability of the network. This allocation ensures long-term engagement from the community, fostering a decentralized and robust ecosystem.

Zcore Holders

0.3% of the total token supply will be allocated to facilitate the migration of existing ZCore holders. This allocation ensures a smooth transition for loyal users, allowing them to seamlessly move their assets into the new ecosystem while maintaining their value and participation.

Foundation

The project team will receive 10% of the total XPAY token supply, which will be distributed over a period of time to ensure their continued involvement and commitment to the project.
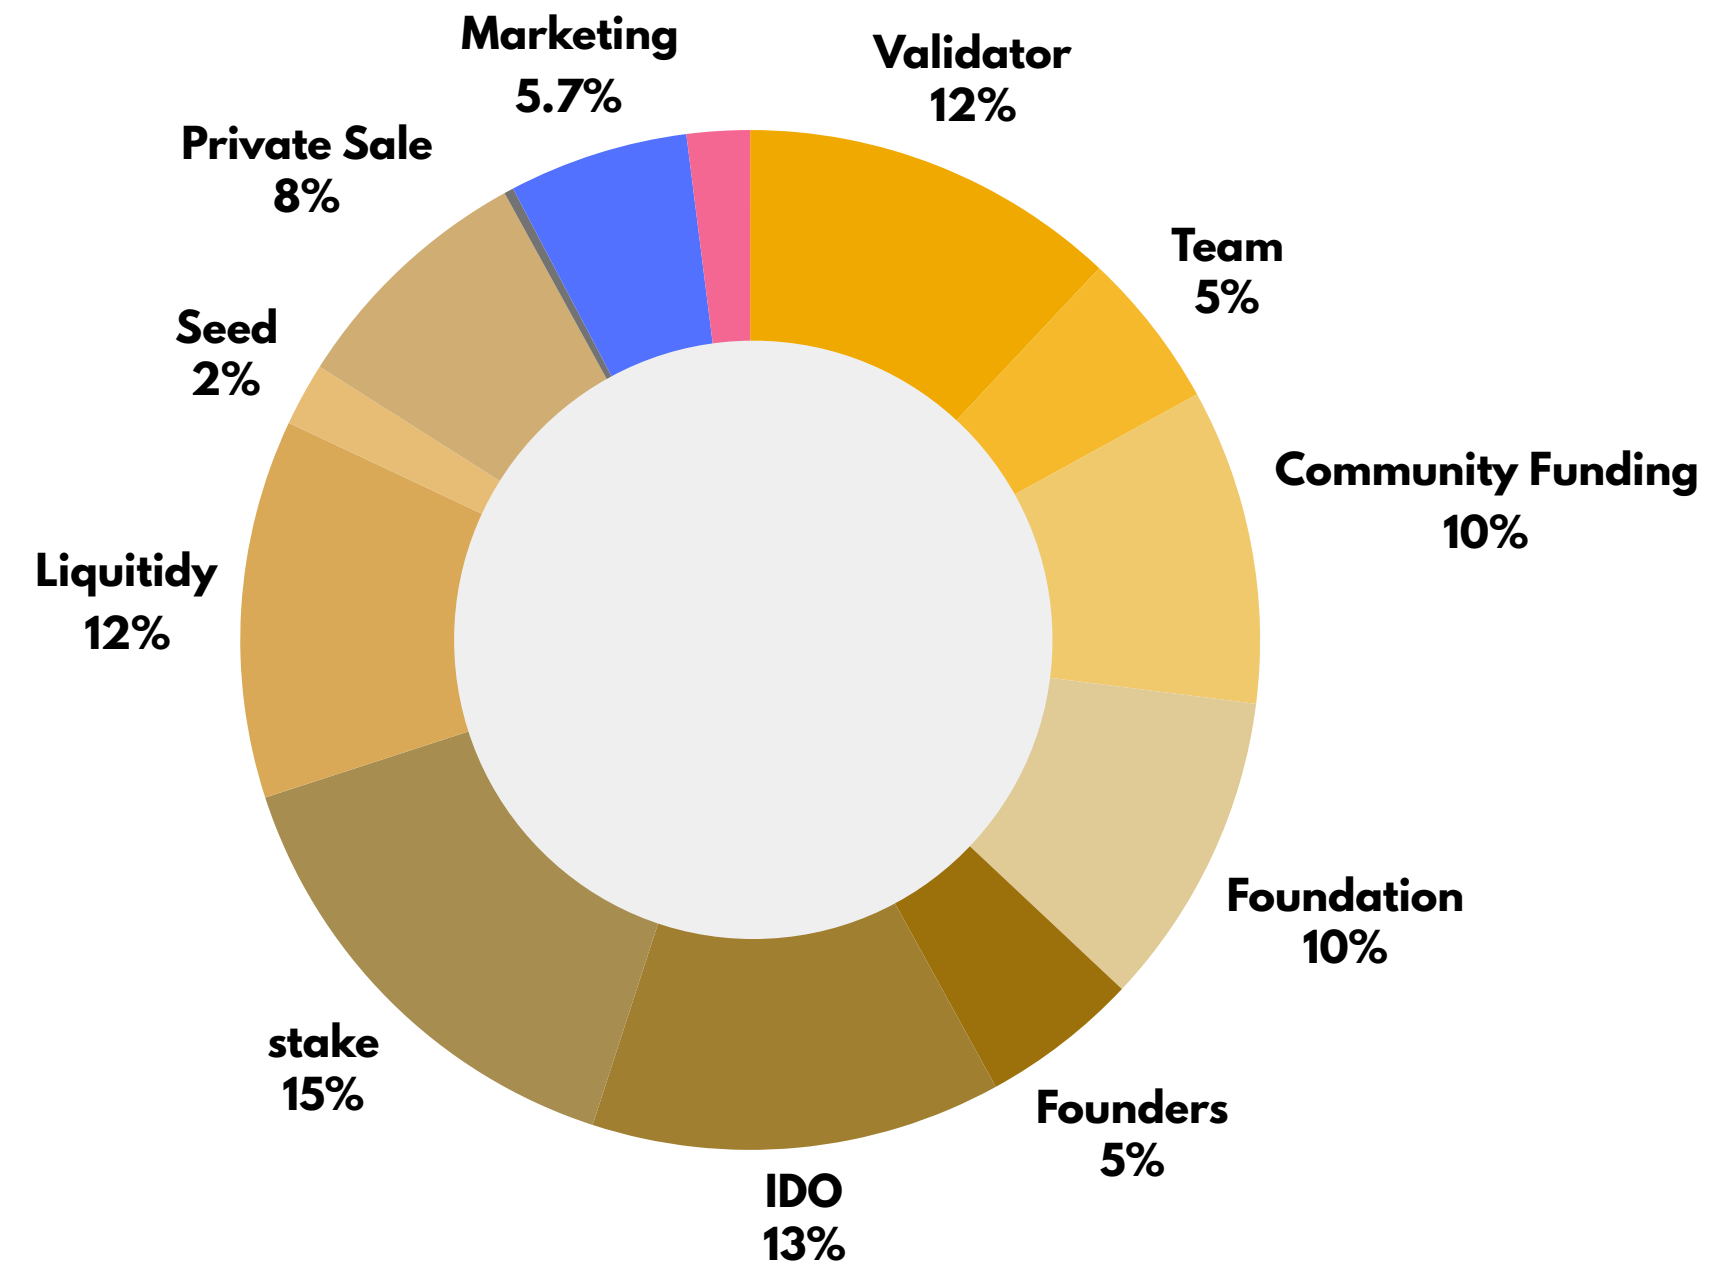

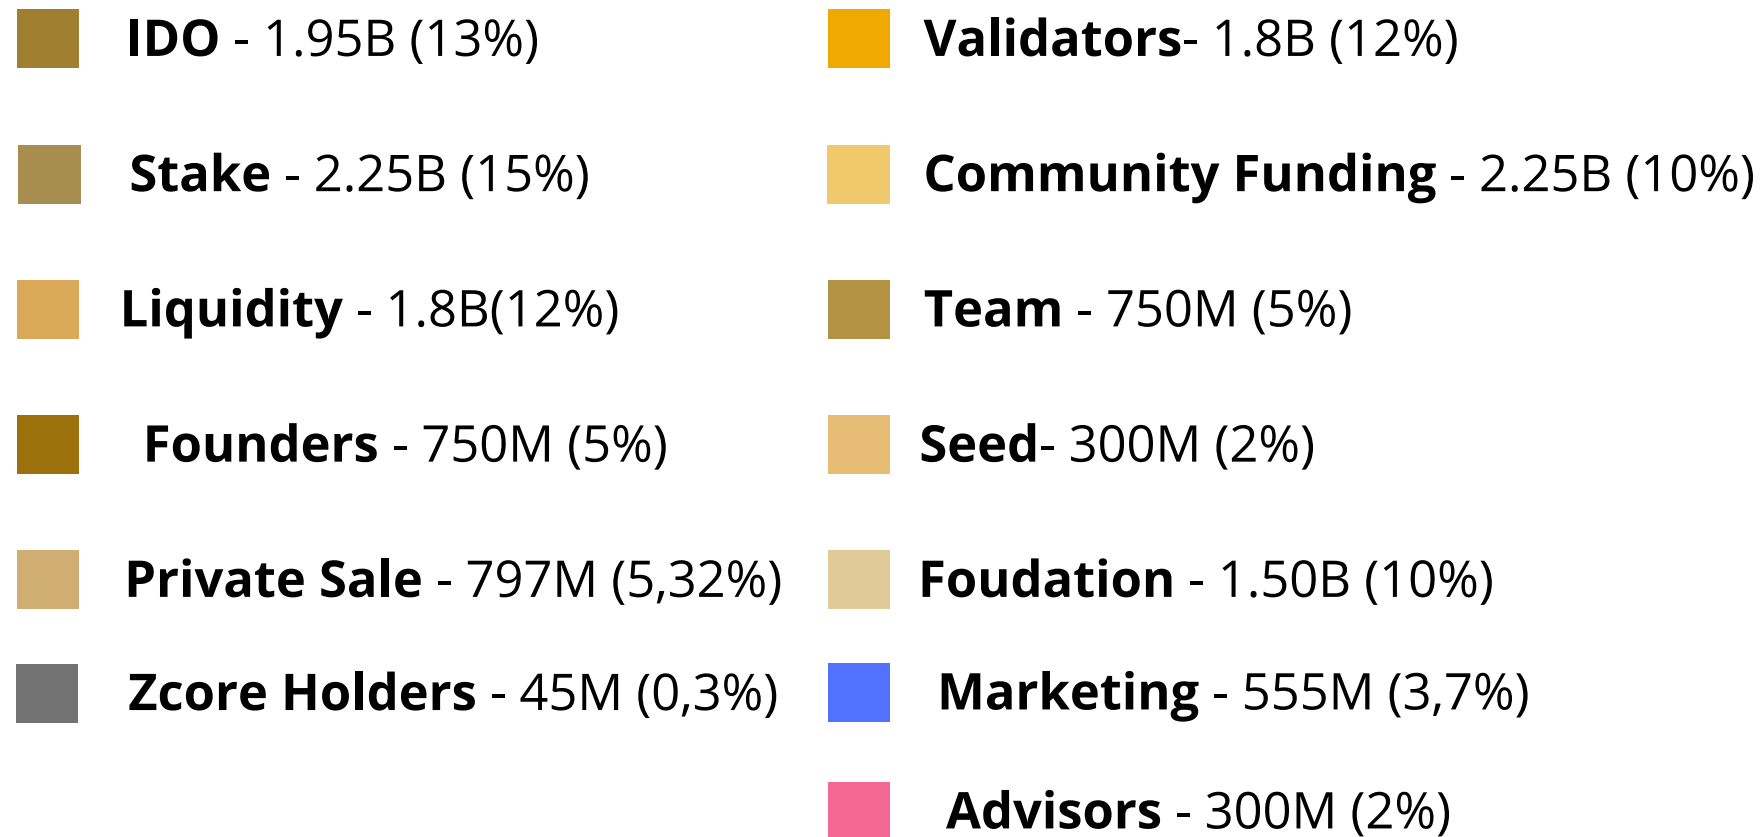

Seed

2% of the total token supply will be allocated for the seed round, providing early investors with an opportunity to support the project's initial development. This allocation will follow a vesting schedule to ensure long-term alignment and commitment from seed investors as the project grows and evolves.
Xchain token allocation

The distribution of Xchain tokens has been carefully planned to ensure a fair and balanced allocation among various stakeholder groups
