I'm a software developer with over five years of experience, passionate about building products that are not just functional but genuinely enjoyable to use. I love transforming complex ideas into clean, well-structured applications that feel intuitive and seamless.
While my main focus is on Flutter, my go-to for building high-quality, cross-platform applications. I'm also comfortable working with other technologies like React and Next.js. I've used Flutter to create mobile apps that are fast, responsive, and visually engaging, and I genuinely enjoy the creative process of bringing a design to life with its flexible UI toolkit.

To boost productivity, I make use of modern AI-powered development tools. I'm experienced with Cursor, Windsurf, and other editors, and I'm comfortable working on platforms like Replit, Bolt, and Lovable. These tools help me move faster and focus on solving real problems instead of repetitive tasks.
I also have strong experience in database design and backend development, which helps me build complete, end-to-end solutions, from architecture to polished user experience.

Alongside development, I've also worked in management roles, leading teams and coordinating projects, experience that helps me guide teams effectively and keep projects on track.

WORK EXPERIENCE

Flutter Developer & Project Manager   Dec 2022 - Jan 2025

Morina Company, Sulaymaniyah/Iraq

1. Flutter Developer (December 2022 - July 2023)
- Developed and optimized mobile applications using Flutter, contributing to multiple projects within Morina Company.
- Collaborated with team members to troubleshoot, debug, and implement new features, ensuring high-quality and user-centered applications.
- Demonstrated technical expertise in Flutter development, delivering efficient and effective code.

1. Project Manager (July 2023 - January 2025)
- Led project planning, execution, and delivery, ensuring alignment with organizational goals and timelines.
- Managed and coordinated cross-functional teams, promoting effective communication and collaboration.
- Fostered a positive and collaborative work environment, building rapport with colleagues and maintaining high levels of team morale.
- Demonstrated adaptability in managing project scope changes, risks, and stakeholder expectations.
- Actively contributed to strategic planning and decision-making, providing insights for continuous improvement and project success. Software Engineer

Flutter Developer (part-time)   May 2024 - Sep 2025

Architech Company, Sulaymaniyah

• Developed core features and maintained mobile applications using Flutter as the primary focus.
• Collaborated with the team to implement best practices, ensuring performance, scalability, and code quality.
• Provided occasional guidance and mentorship to junior developers, supporting their growth in Flutter.
• Assisted in coordinating tasks and tracking progress to keep projects on schedule.
• Supported communication between developers and stakeholders when needed.
