COMPANY INTRODUCTION

“Empowering business with trust, innovation & commitment.”

Zienen Technologies seeks to streamline your business with its services, with having successfully managed programs of packaging design and construction for the automotive industry, developed web & mobile platforms, machined steel spare parts and traded products such as access badges, vests, work tables, and measuring equipment we are an excellent partner for you to be successful, we firmly believe that your success is our success.

Packaging Engineering Services

Program Management, design, & prototyping for your packaging development programs.

IT Engineering services

Focused mainly in identifying your business needs and provide solutions through technology and automation as well as allocation of screened IT personnel.

Industrial supplies & Steel Machining

From coveralls, protective lens and gloves to spare part machined pieces for corporates and people.

THE COMPANY STRATEGY

“ The greatest danger in times of turbulence is not the turbulence itself, but to act with yesterday’s logic.” – Peter Drucker.

PURPOSE

To liberate individuals and businesses from the burden of monotonous activities, allowing them to redirect their time, energy, and creativity towards endeavors that machines cannot replicate.

MISSION STATEMENT

Empower businesses and people with innovative and sustainable solutions that help them achieve their projects faster through a seamlessly experience.

VISION

Become the most trustworthy firm for automotive packaging development and repetitive task automation in Mexico by 2028.

CORE VALUES

We believe in treating our customers with respect and acquiring their trust through transparency and facts, we firmly believe that family is the base of everything.

We look not for an immediate growth but for growing at a rate that allow us to maintain our core values and keep our vision aligned.

We follow the quote:
“What you sow is what you reap”

PACKAGING ENGINEERING

We're a Mexican packaging consulting firm that brings more than 10 years of experience in the packaging engineering field.

OUR SERVICES:

Program Management

We make sure your packaging programs launch smoothly through our expertise. We provide consultancy on supplier assessment and management, risk and cost overview, design & build of steel and plastic reusable Racks & trays while validating build quality prior batch runs and issue root cause and solution.

Engineering Design & Prototyping

In addition of managing your programs, we're also able to do packaging design or early logistic studies for upcoming parts or current programs and also we can help you build prototypes to meet tight deadlines and reduce costs.

Additive (3D) Manufacturing

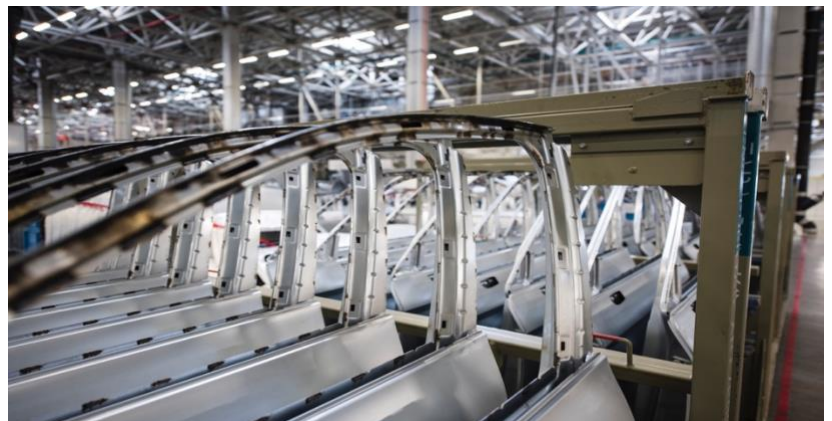

We understand the speed and effectiveness needed to meet the program deliverables, through 3D printing we support you on providing parts to test part fit and build prototypes faster.

Specialized Engineering Resources

Remote or on site packaging engineers and project managers to enhance your capacity and improve communication for the packaging development of new products backed up and supported by zienen.

We focus mainly on packaging programs for the automotive industry, for Tier 1, Tier 2, Engine, Transmission, Batteries and Vehicle plants but we can welcome any business model.
